OPEN TO THE WORLD

Course Guide
2024/2025

OPEN TO THE WORLD SINCE 1868

With great pride, Ca' Foscari University of Venice recently celebrated its 150th anniversary. The university was founded in 1868 as the Scuola Regia Superiore di Commercio (Advanced School for Commerce) by a group of innovative and learned scholars who introduced trade and foreign language studies to Italy, and it continues to be characterised by the same innovative spirit and openness to the world today.

Located in the very heart of the inspiring city of Venice, with its beautiful canals and rich cultural heritage, our university offers a uniquely stimulating and enriching academic environment. You can choose from a wide range of undergraduate and post-graduate degree programmes in either the humanities or the sciences, and we are world-ranked for our teaching and research in economics, management, modern languages, history, environmental science, chemistry, linguistics, accounting and finance, computer science, and geography. The education we offer you encourages interdisciplinarity and exploits innovative teaching methodologies. To further enrich your university experience, you can also broaden your horizons by adding a minor to your undergraduate degree or by taking advantage of special extracurricular learning and training opportunities. Our Active Learning Lab workshops, for instance, refine your soft skills to make you more attractive to employers.

Ca' Foscari also provides you with a host of ways to grow thanks to our emphasis on international education. Not only do we offer many degree programmes entirely taught in English, but we also have a vast network of global partnerships that allow you to earn a joint degree with or carry out an exchange experience at other top-ranked universities in both Europe and around the world. Since your life outside the classroom should be rewarding, too, we have a rich calendar of cultural and social events to keep you stimulated and help you become an active part of our community.

Ca' Foscari and I hope to welcome you to Venice soon!

Tiziana Lippiello
Rector

Introduction

Ca' Foscari, 15th century, Venice

Established in 1868, Ca' Foscari University of Venice is a modern research university with over 23,000 students. It offers a varied array of undergraduate and graduate degrees in both the sciences and the humanities, a significant number of which are taught entirely in English.

Ca' Foscari has a strong international reputation for both teaching and research. The QS World University Rankings have acknowledged its excellence in sixteen different subjects, including modern languages, economics and history, and Ca' Foscari attracts highly talented young researchers.

Heavily invested in being connected to the world, the university has developed a markedly international character. Over 40 languages are taught here and more than 1,500 students participate in exchange programmes scattered around the globe each year. What is more, Ca' Foscari offers more than 30 double and joint degree programmes and has forged a network of over 500 partner universities.

The Ca' Foscari experience is particularly unique due to the university's location in Venice, an inspiring city with a rich history and vibrant present that animate and catalyse contemporary creativity and innovation.

Why choose Ca' Foscari?

WHY STUDY AT CA' FOSCARI?

- You can choose from a wide range of bachelor's, master's and doctoral degree programmes, including many taught entirely in English and dozens offering double or joint diplomas with other respected universities.
- Ca' Foscari offers high-achieving international students specially targeted financial aid.
- You can give your university experience an international edge by taking advantage of our hundreds of study abroad programmes around the globe.
- You can enrich your degree programme with innovative and interdisciplinary workshops dedicated to developing your soft skills and learning to network and work collaboratively.
- You can complement your classroom learning with real-world internships both in Italy and abroad.
- Ca' Foscari invests heavily in expert teaching and innovative research, particularly with the goal of supporting and promoting emerging scholars.
- A Ca' Foscari education prepares you for the working world, as proven by the university's high graduate employment rate.
- When you are not in the classroom, Ca' Foscari helps you cultivate your passions and interests by organising cultural events and offering you the opportunity to get involved in extracurricular activities, including theatre, music, radio, cinema, sports and more.

WHY STUDY IN VENICE?

Most of the university's campuses and buildings are located in Venice, and this makes the Ca' Foscari experience undeniably special. Located in a lagoon on the Adriatic coast in northeast Italy, the city occupies 120 small islands separated by canals and connected by bridges. As a result, its urban fabric is characterised not by traffic-congested roads, but by pedestrian walkways and lively public squares, so it encourages an environmentally conscious, neighbourhood-based lifestyle.

Most importantly, Venice is an intellectually and culturally stimulating city that offers countless ways to learn, grow and be inspired. It has been classified as a UNESCO World Heritage Site thanks to its stunning historical art and architecture, which conjures up the city's extraordinary past as a cultural and commercial crossroads. What is more, every year it plays host to all kinds of internationally renowned exhibitions, events and festivals, offering you endless opportunities for discovering different ideas, traditions and cultures. So studying at Ca' Foscari in Venice means being exposed to top-notch teaching and research in a vibrant, enriching setting.

University profile

PEOPLE

23,000 students, including
1,500 new international students each year

1,300 professors, lecturers
and administrative staff, as well as
100 visiting professors each year

21 bachelor's degrees (3 years)

40 master's degrees (2 years)

16 doctoral degrees (3+ years)

30+ professional master's degree
programmes (1 year)

OPPORTUNITIES

10,000+ internship agreements in Italy and abroad

500+ student exchange agreements

60+ double and joint degrees

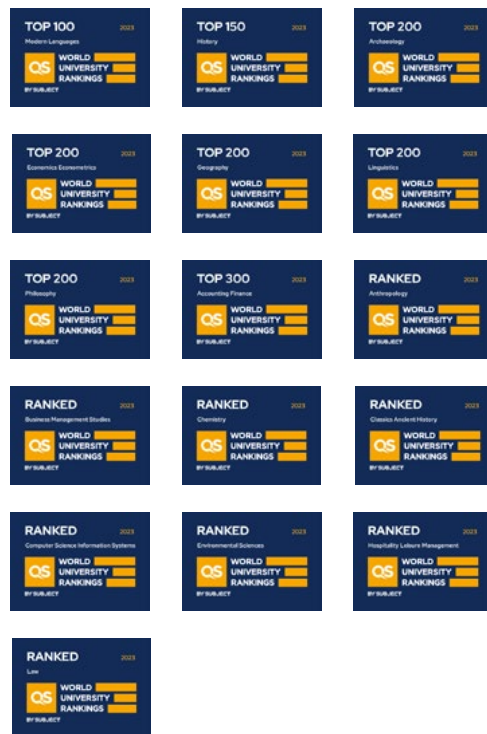

1 Foundation Year

RESEARCH AT CA' FOSCARI

Ca' Foscari's international reputation for innovative and impactful scholarship is a result of its firm commitment to fostering research excellence, especially thanks to the development of international partnerships and the allocation of resources to the funding of promising young scholars' work. Ca' Foscari, in fact, ranks among the top ten universities in all of Europe for the number of prestigious Marie Skłodowska-Curie Fellows it has attracted.

The university actively promotes interdisciplinarity in order to encourage faculty and students to explore new frontiers, and it has recently built a state-of-the-art science and technology campus.

INTERNATIONAL RANKINGS

RESPONSIBLE IMPACT

While Ca' Foscari has been a leader in teaching and research related to economics and modern languages since its founding in 1868, it has greatly expanded its areas of expertise over time. Most recently, the university has been actively developing research and degree programmes involving the study of digital transformation and social innovation, climate change and nanoscience. As a means of harnessing the impactful work being carried out in such a wide range of fields, and in order to ensure that it have the kind of impact on the world around us that the best research should, the university has established the Research Hub for Global Challenges. The hub's function is to encourage, support and coordinate cross-disciplinary collaboration among faculty members with the purpose of leveraging Ca' Foscari's collective knowledge and expertise in the search for solutions to some of the greatest challenges facing us today by channeling the university's energy into six main research areas.

Complexity

The transdisciplinary study of complex systems generates innovative solutions to the most pressing scientific and societal challenges facing the world today.

Digital and Cultural Heritage

New digital technologies help to reveal new meaning in the world around us and create new fields of research such as the digital humanities and conservation science. The innovative approaches these technologies afford change the way cultural heritage is studied, preserved, restored, managed, disseminated and even

created.

Social Innovation

Research in this field aims to break down the barriers that inhibit social participation, to reduce inequality and to promote integration, inclusivity and justice, and to improve healthcare by means of well-designed public policy.

International Studies

Comparative cultural and area studies provide the theoretical and conceptual basis for addressing some of the most urgent challenges of this century, such as radicalisation, migration and integration into increasingly multicultural and multilingual societies both within and beyond the European Union.

Green and Blue Growth

To help create a more sustainable future, Ca' Foscari's research in this area is developing nature-based solutions designed to improve resource and energy efficiency, thereby enabling green technologies (including nanotechnologies) and promoting sustainable growth in the maritime sector.

Innovation Management

Research related to innovation management investigates new frameworks and tools such as economic resilience, the circular economy, systemic and interactive innovation, bio-based products and multi-actor approaches.

MEET OUR DEPARTMENTS AND BUSINESS SCHOOL

Venice School of Management

This department provides the academic knowledge and skills that facilitate the management of companies of any size or type in any field of activity. Classroom study is integrated with counselling and tutorials focusing upon the development of entrepreneurial skills and the leadership qualities new enterprises require.

www.unive.it/dep.management

Department of Asian and North African Studies

*Italian Ministry of Universities and Research
"Department of Excellence"*

This department offers programmes in the study of classical and modern Eastern and African languages within their cultural, religious, artistic, social and historical contexts. A particular emphasis is placed on the political, economic and legal systems of Asia, the Middle East and North Africa.

www.unive.it/dep.dsaam

Department of Economics

*Italian Ministry of Universities and Research
"Department of Excellence"*

This department offers flexible programmes that meets the needs of a complex global economic environment. The main research areas are economics and finance, but they also include legal and social issues, quantitative analysis and the development of decision-making tools.

www.unive.it/dep.economics

Department of Environmental Sciences, Informatics and Statistics

*Italian Ministry of Universities and Research
"Department of Excellence"*

This department provides programmes that explore innovative approaches to the analysis and management of the information and environmental systems that underpin both sustainable development and the preservation of cultural heritage.

www.unive.it/dep.dais

Department of Humanities

This department offers interdisciplinary study programmes in history, archaeology, art history, classical and Middle Eastern studies, as well as Medieval Latin, Romance and Byzantine studies, Italian studies, linguistics, religious studies, geography, philology, communication and text science.

www.unive.it/dep.humanities

Department of Linguistics and Comparative Cultural Studies

*Italian Ministry of Universities and Research
"Department of Excellence"*

This department focuses on the study of foreign languages, linguistics and cultures, emphasising the importance of taking into account their connection to and development within broad and complex cultural systems.

www.unive.it/dep.dslcc

Department of Molecular Sciences and Nanosystems

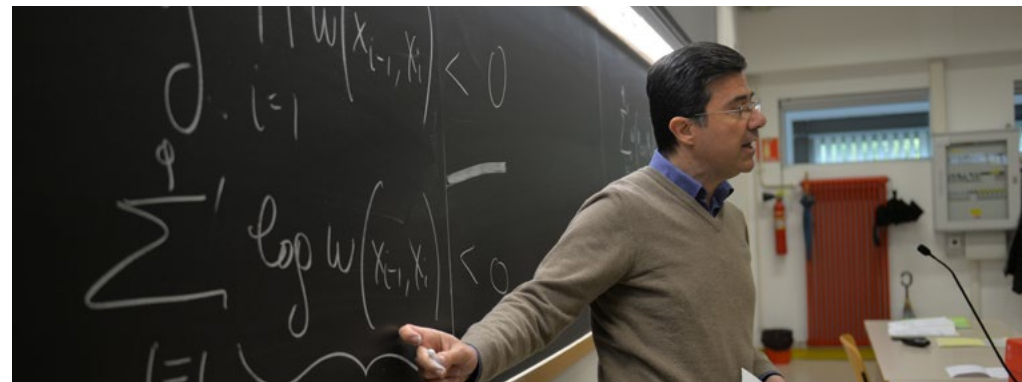

This department combines traditional areas of study in the field of chemistry with the study of renewable energy sources, green chemistry, nanotechnologies and biotechnologies.

www.unive.it/dep.dsmn

Department of Philosophy and Cultural Heritage

This department focuses on the relationship between philosophy and the social, psychological, cognitive, anthropological and pedagogical sciences. It also offers programmes that explore historical, art historical and cultural research dealing with the conservation, maintenance and management of cultural heritage.

www.unive.it/dep.fbc

CONNECTED TO THE WORLD

Ca' Foscari attracts influential academics and dynamic students from around the globe by fostering an inspiring environment in which to learn, teach and carry out research. In order to welcome an ever more varied community of students, the university has a range of degree programmes taught entirely in English and a worldwide network of hundreds of university partners. In the firm belief that international study and research experiences foster creativity and innovation through intellectual and cultural exchange, Ca' Foscari encourages its faculty, students and administrative staff to spend formative periods abroad. To facilitate this, the university has established dozens of double and joint degree programmes with prestigious partner universities in a host of different countries and has over 500 exchange agreements in place, giving those who study and work at Ca' Foscari the chance to learn and grow in virtually every corner of the world. Whether you want to explore Asia or North America, Africa or Europe, South America or Australia, Ca' Foscari paves the way.

Double and Joint Degrees

Double and joint degrees are educational programmes that provide an integrated study curriculum in cooperation with one or more international universities, requiring you to carry out your studies both at Ca' Foscari and at the international partner institution(s). They offer you the invaluable opportunity of learning in more than one academic context while benefiting from carefully coordinated study plans and institutional cooperation. Upon concluding a double (or sometimes multiple) degree, you obtain multiple academic qualifications issued separately by each of the partner universities. When you finish a joint

degree, you receive a single qualification that is jointly conferred by all of the partner universities involved. Ca' Foscari has more than 60 double and joint degree opportunities, so be sure to check if the programme of study you are interested in offers this opportunity.

Exchange Programmes

Ca' Foscari considers international mobility facilitated by student exchange programmes to be a key tool in the development of your academic and cultural knowledge as well as your personal and professional growth, so it offers a range of different student exchange programmes in place to help you learn around the world while working toward obtaining your degree. Thanks to the European Erasmus+ Study Programme, you can take advantage of a study period abroad at one of hundreds of partner universities located in one of the programme's participating countries. As an Erasmus+ exchange student, you attend university courses and benefit from the facilities of your chosen host institution without paying additional tuition fees and partially supported by a grant from the European Commission. Upon successfully completing your course work abroad, you obtain full recognition for the courses you completed. If you would prefer to carry out an exchange period outside of Europe, Ca' Foscari offers the Overseas Programme. This programme, too, offers you access to hundreds of exchange agreements with universities across the globe that do not require you to pay tuition fees to the university hosting you abroad, and the courses you complete while on exchange count toward your degree. What is more, Ca' Foscari has created a fund in support of this programme in order to allow participants to receive a bursary, helping to make the expense of studying abroad more manageable.

International Offices

Since 2017, the university has been opening representative offices abroad called Ca' Foscari Offices in the World. Their purpose is to enhance and leverage global engagement by allowing the university to become an active part of different cultural and intellectual contexts. They achieve this goal by facilitating international research by faculty members and researchers, creating opportunities for students (such as international internships), and fostering cultural exchange through the organisation of events and activities for local communities. The university currently has offices in Suzhou (China), Moscow (Russian Federation) and Baku (Azerbaijan).

ENCOUNTERING THE WORLD IN VENICE

School for International Education

The Ca' Foscari School for International Education (SIE) offers you the opportunity to learn Italian, to take courses about Italian history, language and culture taught in English, and to obtain any missing credits that your chosen degree programme requires you to have before beginning your studies. You can also broaden and enrich your educational experience by applying to participate in one of the SIE's intensive summer programmes, some of which are run in collaboration with distinguished international partners such as Harvard University. www.unive.it/cfsie
cfsie@unive.it

International College

Ca' Foscari's International College (Collegio Internazionale) is a centre of academic excellence for high-achieving students from both Italy and abroad. As a result, the college is one of the most vibrant hubs of cultural and academic exchange in northeastern Italy. If you are accepted for admission to the college, you get to enhance your studies at Ca' Foscari by participating in an innovative interdisciplinary programme of courses and activities organised exclusively for the college's academic community. As a member of the college, you receive a substantial tuition reduction as well as free accommodation in the Santa Marta student residence located in Venice's historic centre. www.unive.it/internationalcollege
collegio.internazionale@unive.it

Ca' Foscari for students

GETTING STARTED

WELCOME UNIT

The Welcome Unit manages the online application procedure you must complete in order to be accepted for enrolment into your chosen degree programme. Then after you arrive it helps you settle in by providing information about and assistance with various administrative processes and university services.

www.unive.it/welcome
welcome@unive.it

FINANCIAL AID UNIT

The Financial Aid Unit provides you with information about tuition fees and offers opportunities for grants, loans and fee reductions.

HOUSING OFFICE

The Housing Office is available to assist you in finding housing in Venice or on the mainland, whether you are looking for a room in a student residence or a space in a shared apartment.

www.unive.it/housing-en

BUDDY PROGRAMME

This programme pairs international students like yourself with experienced students who volunteer to help welcome you to the city and to the university by giving you a hand as you get settled in to life at Ca' Foscari.

buddy@unive.it

INTERNATIONAL WELCOME WEEK

In order to help you get settled in and begin creating your own community of Italian and international students, the International Office organises the International Welcome Week, a series of orientation and social events that begin in later summer and continue through the first weeks of the academic year. The initiatives include everything from workshops about enrolment and immigration processes to student services fairs, and from Dragon Boat outings to international student mixers and breakfasts.

www.unive.it/welcomeweek

LANGUAGE LEARNING CENTRES

The School for International Education offers you the opportunity to learn Italian or improve your knowledge of it. The school's Italian language courses are offered at all skill levels and are open to everyone. The teachers are native-tongue instructors and classes are held in rooms with full multimedia access. If you enrol in an English-taught degree but are interested in beginning to learn Italian or improving your current knowledge of the language, the school offers you a 75% discount on the cost.

www.unive.it/cfsie-en

The University Language Centre (Centro Linguistico di Ateneo) offers you foreign language courses in English, French, Russian, Spanish, Portuguese and German at various levels. If you are enrolled in a degree programme at Ca' Foscari, you are entitled to up to a 65% discount on the cost.

www.unive.it/cla

CAREER SERVICE

Ca' Foscari's Career Service is dedicated to preparing you to enter the workforce after graduation. Throughout the year, it organises career guidance workshops with leading professionals that help you draw your roadmap to professional success, especially by teaching you how to shape your online presence and prepare effective curriculum vitae and cover letters. In addition, the office provides you with useful information about how to tackle job interviews both in Italy and abroad.

INTERNSHIPS IN ITALY AND ABROAD

To give you invaluable on-the-job training and professional work experience, the Career Service office promotes and organises internships both in Italy and all around the world. The university has forged a well-consolidated network of relationships with cultural organisations, NGOs, Chambers of Commerce and a host of companies in order to offer you the opportunity to carry out an internship that will help you realise your professional goals. Internships abroad can be set up either during your studies or shortly after you graduate.

RECRUITMENT DAYS

Ca' Foscari's Career Service organises a series of recruitment days related to all areas of study in collaboration with its network of international and Italian businesses. Last year more than 90 companies participated from the following fields:

- Finance and Consulting
- Industry and Services
- Retail and Consumer Goods
- Food
- Fashion and Lifestyle
- Art and Communication
- Tourism

These opportunities can be useful to you as an international student because your study visa allows you to seek employment in Italy for a full year after graduation in order to launch your career.

STUDENT ASSOCIATIONS

Student associations play a crucial role in bringing students together and involving them in university life, so Ca' Foscari actively supports their recreational and cultural initiatives.

associazioni.studenti@unive.it

www.unive.it/associazioni-studenti

ERASMUS STUDENT NETWORK (ESN)

With over 12,000 members from 390 local sections in 36 countries, the Erasmus Student Network supports and promotes international mobility by providing you with opportunities for cultural understanding and self-development through a network of students helping students.

LIFE IN VENICE

Every day the city offers its residents – a large number of whom are students – the chance to feed their thirst for knowledge thanks to seemingly endless artistic and cultural exhibitions, initiatives and events. Studying in Venice means living and breathing art, architecture and culture. It also means living an environmentally conscious lifestyle. One of the most eagerly awaited moments in a Venetian student's day is the so-called *aperitivo in campo*, or outdoor aperitif: from the afternoon through to late evening, areas of the city such as Campo Santa Margherita and the Erbaria at Rialto turn into venues where people gather to chat and listen to music while they drink *spritz* and eat *cicchetti* – the traditional drink and snacks for which Venice is famous.

CA' FOSCARI CULTURAL EVENTS

Apart from regular events such as conferences, guest lectures and seminars featuring prominent scholars and cultural figures, Ca' Foscari organises some of Venice's most popular cultural events. Here is a selection:

- Art Night Venezia, an evening of open museums and galleries dedicated to art lovers
- Ca' Foscari Short Film Festival, the first international festival in Europe created and organised by students that showcases student work
- Incroci di Civiltà (Crossroads of Civilisations), a renowned international literary festival
- Venetonight, the European Researchers' Night
- International Universities Challenge during Venice's annual Historical Regatta
- National and international Dragon Boat Races

OTHER NOT-TO-BE-MISSED EVENTS ON THE VENETIAN CALENDAR

- Carnival, usually in February: The traditional celebration before the beginning of Lent for which all of Venice's public squares are transformed into outdoor clubs hosting special events, parties and live music.
 - The Redentore Festival (Festa del Redentore): A popular local festival celebrating the city's recovery from the plague in the sixteenth century for which a spectacular fireworks display is organised. Venetians watch the show from the *fondamente* and their boats, eating and drinking.
 - Venice Biennale: The world's premiere international contemporary art and architecture exhibition that runs from May to November.
 - Venice Film Festival: A world-renowned festival that takes place in September on the Lido, showcasing some of the year's most noteworthy films and attracting influential contemporary movie directors and actors.
- For further information about Venice's cultural events, visit www.veneziaunica.it/en.

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

The European Credit Transfer and Accumulation System (ECTS) facilitates the transfer of university credits between universities in Europe. It is based on the clarity and transparency of students' study plans and on the assignment of appropriate credits for the studies they complete. The system is designed to guarantee that an exchange student's courses and exams are recognised by his or her home institution. Ca' Foscari has established that 1 CFU, or Ca' Foscari credit (*credito formativo universitario*), is equivalent to 1 ECTS credit.

One CFU is associated with a workload of 25 hours, which is the sum of both the time spent in the classroom and individual study.

For more information about the ECTS system and grade conversion, visit www.unive.it/ects-english.

Foundation Year

photo: Tony Hisgett

Ca' Foscari's School for International Education offers an English-taught university preparatory programme called the Foundation Year. The programme is designed to get high school graduates ready to enrol in a bachelor's degree programme taught in either English or Italian. The programme runs for 8 months, from October until June.

The Foundation Year is right for you upon completion of high school if:

- you will have only 11 years of schooling instead of the 12 required to enrol in a bachelor's degree programme in Italy
- you want to improve your English language skills before applying for admission to an English-taught bachelor's degree programme
- you want to learn Italian in order to apply for admission to an Italian-taught bachelor's degree programme
- you studied in the United States and do not have the three Advanced Placement exams required to enrol in a bachelor's degree programme in Italy
- you studied in the UK and do not have the three A-levels required to enrol in a bachelor's degree programme in Italy

OR

- if you have a vocational qualification

CONTACTS:

School for International Education
foundation.cfsie@unive.it

Ca' Foscari's Foundation Year has three component parts, two of which allow you to tailor the preparation you receive to your personal needs and interests:

A. General curriculum

All Foundation students take this block of courses, which include Critical Thinking, Modern and Contemporary Italian History and Academic Skills.

B. Language module

The programme's language-focused component concentrates either on improving your knowledge of English (International Option) or on learning or improving your knowledge of Italian (Bridge Options), or, if you are a native speaker of English or Italian, it can help bolster your academic mastery of the relevant language (Native Speaker Option).

C. Study track

This block of courses helps you prepare for university study in your specific field of interest. There are three tracks from which to choose:

- Economics and Management
- Humanities and Arts (taught in English or Italian)
- Science & IT

Entry language level: certified knowledge of English at a B1 level (lower intermediate, according to the Common European Framework for Languages)

Fees: € 5,000; some partial fee reductions are available

How to apply: online at apply.unive.it

Bachelor's degree programmes

ECONOMICS AND MANAGEMENT

- Business Administration  
- Digital Management 
- Economics and Business  
- Hospitality Innovation and e-Tourism 
- International Trade and Tourism 

LANGUAGES AND CULTURES

- Ancient Civilisations for the Contemporary World 
- Hospitality Innovation and e-Tourism 
- Language, Culture and Society of Asia and Mediterranean Africa 
- Languages, Civilisation and the Science of Language 
- Linguistic and Cultural Mediation 

SCIENCE AND TECHNOLOGY

- Computer Science  
- Engineering Physics 
- Environmental Engineering for the Ecological Transition 
- Environmental Sciences 
- Hospitality Innovation and e-Tourism 
- Science and Technologies for Cultural Heritage 
- Sustainable Chemistry and Technologies 

ARTS AND HUMANITIES

- Ancient Civilisations for the Contemporary World 
- Conservation of Cultural Heritage and Performing Arts Management 
- History 
- Hospitality Innovation and e-Tourism 
- Humanities 
- Philosophy 
- Philosophy, International and Economic Studies 

PUBLIC GOVERNANCE AND SOCIAL CHANGE

- Social Sciences and Social Work 

INTERNATIONAL STUDIES AND GLOBALISATION

- International Trade and Tourism 
- Language, Culture and Society of Asia and Mediterranean Africa 
- Language, Civilisation and the Science of Language 
- Philosophy, International and Economic Studies 

PRESERVATION AND MANAGEMENT OF CULTURAL HERITAGE

- Ancient Civilisations for the Contemporary World 
- Conservation of Cultural Heritage and Performing Arts Management 
- Science and Technologies for Cultural Heritage 

Interdisciplinary programmes appear in more than one study area.

ADMISSION TO BACHELOR'S DEGREE PROGRAMMES

ENTRANCE QUALIFICATIONS

In order to enrol in any undergraduate degree programme, you must have at least 12 years of compulsory education and your educational history needs to be pre-evaluated by Ca' Foscari in order to confirm that it grants admission to an undergraduate study programme in Italy.

ADMISSION

Some undergraduate programmes have limited enrolment (*accesso programmato*) whereas others do not (*accesso libero*).

If you apply for a programme without an admission cap, you can enrol directly, and then, if necessary, satisfy any Additional Learning Requirements established by your pre-evaluation. If you apply for a programme with limited enrolment, you must be ranked through a pre-enrolment selection process. Depending on your citizenship and country of residence, this involves taking an entry test.

To find out how the entry test for a specific programme would take place in your case, please write to welcome@unive.it.

ADDITIONAL LEARNING REQUIREMENTS

Ca' Foscari's pre-evaluation process makes sure that you will be properly prepared to carry out your university studies. If you are missing some of your programme's entry requirements, you will be asked to fulfil Additional Learning Requirements (*obblighi formativi aggiuntivi*, or OFA) by taking the appropriate remedial courses. OFAs have no impact on the number of credits that you are required to obtain during your studies or on your grade point average – they are pass/fail only.

LANGUAGE REQUIREMENTS

All of Ca' Foscari's undergraduate programmes require you to have a certified minimum B2-level of knowledge (as defined by the Common European Framework of Reference for Languages, or CEFR) of your programme's language of instruction. If you are a native speaker or have already studied in the relevant language, you do not need a certificate. If you are interested in an Italian-taught programme, you must also demonstrate a certified minimum B1-level knowledge of English. If you are not an EU citizen and you reside outside Italy, you must demonstrate your level in Italian either by obtaining one of the certificates recognised by the Italian Ministry of Universities and Research (MUR) or by taking the Italian language test that Ca' Foscari arranges in Venice shortly before the beginning of the academic year. You can find more information about language requirements at www.unive.it/language-requirements.

ENRICH YOUR DEGREE

MINORS

A minor is a course of study comprising 18 ECTS credits that are broken down into three modules of 6 ECTS credits each. It allows you to enrich your education by broadening your horizons beyond your principal study area. You can choose from any of the available minors as long as there is no overlap in content with your chosen degree programme.

While a wide selection of minors are available in Italian, ranging from topics about management to cultural studies, and from finance to gender studies, some taught recently in English include:

- Computer and Data Science
- Energy, Climate Change and Environmental Risks
- Gender Studies

ANCIENT CIVILISATIONS FOR THE CONTEMPORARY WORLD

Language of instruction: 

This markedly interdisciplinary programme is offered collaboratively by a number of departments at Ca' Foscari University of Venice (Department of Asian and North African Studies; Department of Philosophy and Cultural Heritage; Department of Humanities) and the University of Milan La Statale (Department of Cultural and Environmental Heritage; Department of Literary Studies, Philology and Linguistics).

Taught entirely in English, the programme is designed to explore the multi-faceted complexity of ancient civilisations that flourished in Europe, Northern Africa, and Eastern and Western Asia with the particular goal of learning about, and from, the past in order to be better capable of critically assessing the modern world's complexities and challenges. As a result, the programme's approach places special emphasis on the study of cultural intersection, exchange and tensions.

The degree's study plan is organized in four areas, which together provide you with a solid knowledge and training in the study, management and promotion of the cultural heritage of various ancient civilisations:

- Tangible Cultural Heritage: history and interpretation
- Tangible Cultural Heritage: discovering, cataloguing, preserving and archiving
- Intangible Cultural Heritage: history, anthropology, philosophy, history of religions, law
- Intangible Cultural Heritage: languages and literatures

CAREER OPPORTUNITIES

As a student enrolled in this programme, you would already acquire some professional experience before graduation thanks to the programme's obligatory curricular internship. As a graduate, you would have the preparation you need in order to seek employment in various roles contexts, including, but not limited to the following:

- Cultural operator in charge of services such as the management and/or implementation

- of reception services at archaeological sites, museums, exhibitions, cultural associations, foundations, or similar bodies and institutions
- Collaborator in the cataloguing of cultural heritage in foundations, cultural associations, auction houses, or similar bodies and institutions
- Assistant curator in the organization of exhibitions and cultural events
- Excavation technician or assistant

- Museum technician
- Cultural communicator or consultant for the entertainment industry in projects involving a historico-cultural nature

ENTRY REQUIREMENTS AND ADMISSION

- You must take a written entry test. For more information, please consult the programme page on the [website of the University of Milan](https://www.unive.it/degree/It17).

BUSINESS ADMINISTRATION

Language of instruction:  or 

Do you want to work in an industrial, commercial or financial institution? This programme provides you with the skills you need for the marketing sector, administration and business management, organisation and staff management, and the finance and financial intermediation sectors. Thanks to agreements with the Order of Chartered Accountants and Accounting Experts of Venice and the Order of Labour Consultants of Vicenza, you have the option of carrying out a professional internship during the final year of your degree.

If you are interested in pursuing a career in an international context, the Business Administration and Management curriculum, which is entirely taught in English, is right for you.

CURRICULA

- Business Administration 
- Business Administration and Management 

CAREER OPPORTUNITIES

Graduates can find employment as managers and consultants in industrial, business, banking, finance and insurance companies and enterprises, both in Italy and abroad. Potential career fields include:

- Management and supervision in the private sector
- Human resources
- Workplace organisation
- Accountancy
- Finance
- Sales and distribution
- Marketing

ENTRY REQUIREMENTS AND ADMISSION

- You must take an online written entry test that assesses your knowledge of mathematics and logic in order to be evaluated for admission to either curriculum. When the test takes place depends upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult the profile of your preferred curriculum at apply.unive.it.

It is possible to substitute the entry test by taking the SAT; for information about the rules that apply in your case, please write to prospective.students@unive.it.

- For the Business Administration curriculum, a **certified B2-level knowledge of Italian and a certified B1-level knowledge of English** are required; for the Business Administration and Management curriculum, a **certified B2-level knowledge of English** is required.

COMPUTER SCIENCE

Language of instruction:  or 

The theoretical and experimental knowledge of computer science that this programme offers has been recognised as outstanding by several Italian professional associations. The degree provides you with core conceptual competencies in informatics, including analytical, planning and development skills, as well as methodological and technological know-how. The English-taught Data Science curriculum focuses your studies more specifically on data collection and analysis, a new and particularly thriving field. In your second year you can apply to transfer into the European Computer Science curriculum, which would allow you to earn a double degree by carrying out a year of your studies at one of our European partner universities. On the other hand, if you would like to study in Italian, the more traditional Technologies and Information Science curriculum allows you to explore professional fields in computer science such as web technologies/design and informatics system administration.

CURRICULA

- Data Science 
- European Computer Science (double degree)
- Technologies and Information Science 

CAREER OPPORTUNITIES

Graduates can pursue careers in the software production and data analysis sectors with manufacturing companies in the fields of information systems and processor networks, or with organisations, local authorities and professional laboratories that work with complex information processing systems and methods. Possible careers include:

- Computer programmer

- Applications expert
- Web technician
- Database technician
- Network and systems technician

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics, abstraction and methodological accuracy. For specific information about the right test for you, consult the profile of your preferred curriculum at apply.unive.it.
- For the Data Science curriculum, a certified B2-level knowledge of English is required.
- For the Technologies and Information Science curriculum, a **certified B2-level knowledge of Italian and a certified B1-level knowledge of English** are required.

DOUBLE/JOINT DEGREES AVAILABLE

Double degrees in European Computer Science are in place with: Universität Hamburg (Germany); Universidad de Burgos (Spain); Instituto Politécnico de Coimbra (Portugal); Université de Lorraine (France); West University of Timișoara (Romania); Turku University of Applied Sciences (Finland).

CONSERVATION OF CULTURAL HERITAGE AND PERFORMING ARTS MANAGEMENT

Language of instruction: 

Would you like a career as a conservation specialist or an artistic heritage manager? This innovative programme is designed to help you achieve this goal. Different curricula allow you to specialise in art history, archaeology, the performing arts and media, or the management of arts and cultural activities. The programme incorporates both historic and artistic aspects because working in the field of cultural heritage requires you to have an in-depth knowledge of a specific historical context. Depending on the curriculum you choose, you also acquire methodological skills in management (legislation), conservation (restauration, maintenance, prevention), documentation (cataloguing, graphic reproduction), promotion (project design, finding resources and funding, financial planning) and cultural heritage.

CURRICULA

- Archaeology 
- Art History 
- Economics and Management of Arts and Cultural Activities 
- Performing Arts and Media Studies 

CAREER OPPORTUNITIES

Graduates can find employment in local government and with agencies involved in the protection, conservation and management of archaeological and historical-artistic heritage or the in promotion of artistic events, the performing arts and the culture industry. Possible careers include:

- Event organiser
- Television, film and theatre producer

- Museum professional
- Art valuation

ENTRY REQUIREMENTS AND ADMISSION

- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required.

DIGITAL MANAGEMENT

Language of instruction: 

Created in partnership with the digital business incubator H-Farm, this innovative programme is unique in Italy and trains you to be a motivated specialist in digital transformation capable of launching start-ups or helping a business go digital.

The degree is entirely taught in English and offers you an engaging learning experience that emphasises interdisciplinary training, problem solving and team-based teaching. It features a strong programme of extra-curricular activities that include soft skills development, and from your very first year you will be put in close contact with mentors involved with start-ups and the digital world. Project work in companies plays a fundamental role in the curriculum, and the companies within the Ca' Foscari and H-Farm network offer opportunities for personal development by introducing you to innovative business ideas. The programme is taught on the H-Campus at Ca' Tron, Roncade (near Treviso).

CAREER OPPORTUNITIES

Graduates possess the training they need to become business executives capable of identifying, interpreting and managing new organisational processes and business methods. Possible careers include:

- Digital project manager
- Digital manager
- Business developer
- Growth hacker

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics and logic in order to be evaluated for admission. The test's format and

when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it. It is possible to substitute the entry test by taking the SAT; for information about the rules that apply in your case, please write to prospective.students@unive.it.

- A **certified B2-level knowledge of English** is required.

ECONOMICS AND BUSINESS

Language of instruction:  or 

Do you want to specialise in economics and be capable of working both in Italy and abroad? This flexible and in-depth programme provides you with the skills you need to critically analyse economic phenomena and tackle the world of private businesses or public organisations. Apart from the lecture-based courses, the programme incorporates workshops and internships to help you acquire the expertise you need for the working world. Thanks to two separate curricula, can choose whether to study in Italian or in English.

CURRICULA

- Economics and Business 
- Economics, Markets and Finance 

CONTACT INFORMATION:

Department of Economics
Economic Campus, Cannaregio 873, Venice
campus.economico@unive.it

www.unive.it/degree/et4

CAREER OPPORTUNITIES

Depending on the curriculum they complete, graduates can find employment as consultants in the field of economics or take on a professional role in the public and private sectors of tourism. Career opportunities can be found in the following fields, among others:

- Accounting
- Financial and administrative management
- Banking
- Advertising

ENTRY REQUIREMENTS AND ADMISSION

- You must take an online written entry test that assesses your knowledge of mathematics and logic in order to be evaluated for admission to either curriculum. When the test takes place depends upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult the profile of your preferred curriculum at apply.unive.it. It is possible to substitute the entry test by taking the SAT; for information about the rules that apply in your case, please write to prospective.students@unive.it.
- For the Economics and Business curriculum, a **certified B2-level knowledge of Italian and a certified B1-level knowledge of English** are required; for the Economics, Markets and Finance curriculum, a **certified B2-level knowledge of English** is required.

ENGINEERING PHYSICS

Language of instruction: 

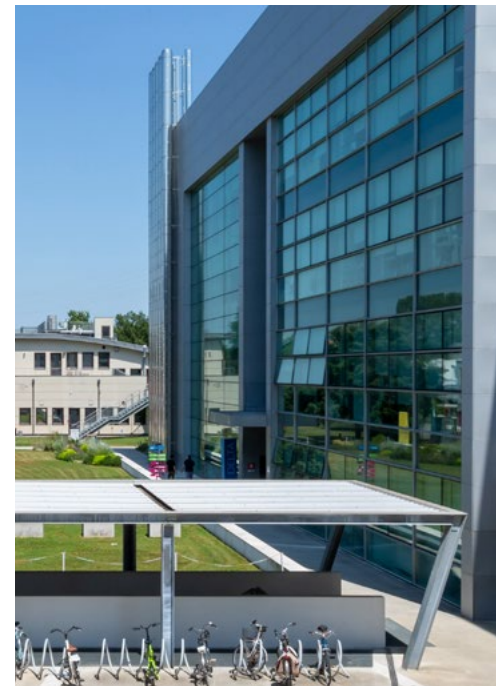

This programme trains you to be a modern, professionally cosmopolitan engineer with the skills you need to tackle a wide range of issues related to advanced technology, whether these are linked to energy, materials, computer science, biomedicine or “quantum computing”. Engineering physics experts are multi-skilled professionals who combine expertise in two disciplines: the fundamentals of science and the practicality of engineering. This makes them capable of adapting to situations in continuous technological evolution, including the fields known as Complexity Sciences such as neuroscience or quantum physics.

CAREER OPPORTUNITIES

Graduates of the programme will be able to work in all technologically advanced sectors related to both production (materials, nanotechnology, biomedicine) and processing (numerical modeling, multi-variable systems, cyber security). There are employment prospects for graduates in both Italy and abroad.

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics, science and logic as well as your verbal comprehension in order to be evaluated for admission. The test’s format and when it occurs depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult the programme’s profile at apply.unive.it.
- A **certified B2-level knowledge of Italian and a certified B1-level knowledge of English** are required.

ENVIRONMENTAL ENGINEERING FOR THE ECOLOGICAL TRANSITION

Language of instruction: 

This degree programme trains you to be a professional with a strong interdisciplinary background and knowledge of processes, service management, production chains and plant engineering with a focus on the standards required for the ecological transition according to the new European consensus on environmental protection. The first year of study provides you with basic skills and a strong foundation in mathematics, physics and chemistry, while the second and third years introduce greater specialisation with coursework related to the environment, energy, ecology, chemical and process engineering, sustainable design and process life cycle analysis, environmental law, IT applied to the monitoring of production chains, and chemical and biochemical plant engineering.

CAREER OPPORTUNITIES

The professional opportunities available to graduates are those associated with junior engineers, especially in civil engineering, environmental and land engineering, safety engineering and civil, environmental and land protection.

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics, science and logic as well as your verbal comprehension in order to be evaluated for admission. The test's format and when it occurs depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult the programme's profile at apply.unive.it.

- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required.

ENVIRONMENTAL SCIENCES

Language of instruction: 

If you are interested in developing solutions for environmental problems, diagnosis plans or prevention strategies, this programme prepares you to do so by equipping you with the multidisciplinary skills you need. The degree involves core courses in mathematics, physics, chemistry, biology, ecology and geology, as well

as specific courses in environmental science, in order to provide you with a rich understanding of environmental economics, ecology, environmental chemistry, law and environmental planning. It also teaches you how to evaluate environmental impact. You can push your knowledge further thanks to workshops, labs and field activities, and during your second year you will get to spend a special intensive week with professors, researchers and tutors, a unique opportunity in Italy. What is more, thanks to Ca' Foscari's numerous exchange agreements, you can choose to spend a semester or a year at a partner university abroad.

CAREER OPPORTUNITIES

Graduates can leverage their multidisciplinary skills to work in the diagnosis and prevention of environmental issues, as well as the development of strategies for managing them, at both public and private agencies and organisations. Possible fields of employment include:

- Renewable energy and energy conservation
- Environmental control
- Waste collection and management
- Agriculture and forestry

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics, abstraction and methodological accuracy in order to be evaluated for admission to the programme. For specific information about the right test for you, consult the profile of your preferred curriculum at apply.unive.it.
- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required.

HISTORY

Language of instruction: 

This programme provides you with the foundation for carrying out historical, anthropological, social and documentary research in different historical periods. Based on the curriculum you choose, the programme introduces you to ancient, Roman, medieval, modern or contemporary history as well as to aspects of anthropology and geography. The anthropological, archival and historical approaches employed will allow you to explore other fields as well. Thanks to the skills that the degree helps you to acquire, you are prepared to launch a career in a variety of fields, including cultural heritage management, communication, cultural event organisation and publishing.

CURRICULA

- Anthropological 
- Archival Librarian 
- Historic – The Mediterranean World from Antiquity to the Middle Ages 
- Historic – From European Hegemony to Globalisation 

CAREER OPPORTUNITIES

Graduates are equipped either to continue on to graduate study or to seek employment at both public and private institutions connected to the study or preservation of history. Possible career fields include:

- Archives and museums
- Arts administration

ENTRY REQUIREMENTS AND ADMISSION

- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required.

HOSPITALITY INNOVATION AND E-TOURISM

Language of instruction: 

This innovative degree is designed to help you launch a career in the field of hospitality and tourism. To achieve this, it equips you with the cutting-edge skill set and knowledge required to take on a managerial role in the hospitality industry while also familiarising you with the phenomena of digital transformation and sustainability in relation to the tourism sector. The study plan is calibrated to ensure that you acquire a nuanced understanding of the complex phenomenon of tourism from a variety of complementary perspectives by exploring it through social, economic, cultural, anthropological and environmental lenses.

What makes this degree particularly special is that it is offered through the Scuola Italiana di Ospitalità (Italian School of Hospitality), which partners Ca' Foscari with the Italian hospitality company TH Resorts. This university–private sector partnership is designed to expose you to real-world contexts and dynamics throughout your degree in order to provide an invaluable springboard for the launch of your managerial career: almost a third of your university credits are earned through professional internships in hospitality-related contexts and businesses, so during your studies you already get tangible work experience and begin to create a professional network.

While graduates of the degree are able to proceed with their university studies at the master's level, the programme is designed for students who want to jump into the working world at the middle management level immediately after having concluded their undergraduate studies.

CAREER OPPORTUNITIES

Once you graduate, you will have the preparation you need to assume operational, managerial or

consultancy roles in a wide range of contexts within the hospitality and tourism sectors both in Italy and abroad. You will be ready to forge a professional career at modern tourism companies and hotels in all of their departments (e.g., Marketing, Information and Communication Technologies, Food and Beverage, Guest Relations, Events Planning and Management) as well as at destination-management organisations and public bodies connected with tourism.

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics, logic and verbal comprehension in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it. It is possible to substitute the entry test by taking the SAT; for information about the rules that apply in your case, please write to prospective.students@unive.it.

HUMANITIES

Language of instruction: 

This programme focuses on linguistic history and the figurative and literary culture of Europe and the ancient Mediterranean world from the medieval period to the present day. You can choose between two curricula: Antiquity; or Science of the Literary Text and Communication. The programme offers you the unique opportunity to apply for a double degree in Italian Studies and the History of Art with the University College London, attending classes in both Venice and London. The programme provides you with a direct knowledge of texts and original documents as well as a critical approach with regard to how knowledge, ideas and information have been passed on over the centuries. Thanks to the skills you gain, you will be equipped to establish yourself in a range of professional fields, from the dissemination of information to cultural heritage conservation and management, and from archival cataloguing to the critical analysis of information.

CURRICULA

- Antiquity 
- Science of the Literary Text and Communication 

CAREER OPPORTUNITIES

Graduates possess the basic knowledge necessary for teaching at middle schools and high schools. They are also prepared to take on a professional role at public or private institutions in a variety of cultural areas. Possible career fields include:

- Journalism
- Cultural management
- Cultural consulting
- Administration
- Archives and libraries

ENTRY REQUIREMENTS AND ADMISSION

- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required.

DOUBLE/JOINT DEGREE AVAILABLE

Double degree with University College London (UK) Applications are submitted via the UCAS portal and are evaluated by UCL.

INTERNATIONAL TRADE AND TOURISM

Language of instruction: 

This programme develops an in-depth understanding of economic issues by equipping you with a wide range of analytical tools in the economic, business, legal and quantitative fields. The Foreign Trade curriculum provides the skills you need to manage complex import-export relations in business, to value investments in foreign markets and to organise production processes on an international scale. In the Tourism Economics curriculum, you learn to interpret trends in global tourism markets and to understand the complexity and the transversality of the tourism industry. You also acquire the know-how to set up development plans for private or public organisations operating in the tourism sector or in a tourist destination. In order to foster your personal development, the programme incorporates an internship at a business or institution, which you are encouraged to carry out abroad.

CURRICULA

- Foreign Trade 
- Tourism Economics 

CAREER OPPORTUNITIES

Graduates are prepared to launch careers as export business relations specialists, executive assistants or foreign-trade area managers. They are also ready for employment as executive assistants or assistants to CEOs, export managers and purchasing managers. Possible career fields include:

- Financial and administrative management
- International trade research consultancy
- Process organisation and management
- Commercial organisation

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics and logic in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.
- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required.

LANGUAGE, CULTURE AND SOCIETY OF ASIA AND MEDITERRANEAN AFRICA

Language of instruction: 

Are you interested in learning more about Asia or the Near and Middle East? This programme allows you to choose any of the following languages as your focus: Arabic, Armenian, Chinese, Hebrew, Hindi, Japanese, Korean, Persian or Turkish. It teaches you writing and speaking skills in one or two languages as well as an advanced knowledge of English or French. It also introduces you to internationally recognised scholars, provides hands-on exercises with native speakers and offers the possibility of studying and/or carrying out an internship abroad. The programme explores the cultural and religious heritage of your chosen region as well as its history, literature, economics, legal system and social dynamics. With the knowledge and skills you acquire, you can either continue your education with a master's degree or apply for international and multicultural jobs both in Europe and beyond in a variety of fields, including translation, interpreting, publishing, tourism, journalism, linguistic instruction. You are also equipped to work in social/educational services, welcome services for immigrants, the organisation and promotion of cultural and artistic events, the export of Italian goods and the import of Asian and Near or Middle Eastern products.

CURRICULA

- China 
- Japan 
- South Korea 
- Indian Subcontinent 
- Near and Middle East 
- South-East Asia 

LANGUAGES

China Curriculum / Japan Curriculum / South Korea Curriculum

- First language (three years): Chinese, Korean or Japanese
- Second language (one year): Arabic, Armenian, Chinese, Hebrew, Hindi, Georgian, Japanese, Korean, Modern Greek, Persian, Sanskrit, Thai, Tibetan, Turkish or Vietnamese

Indian Subcontinent Curriculum

- First language (three years): Hindi
- Second language (two years): Arabic, Chinese or Persian

Near and Middle East Curriculum

- Two languages for three years: Arabic, Armenian, Hebrew, Persian, or Turkish
- Other possible languages: Georgian, Modern Greek, Tibetan or Vietnamese

South-East Asia Curriculum

- Two languages for three years: Thai and Vietnamese

CAREER OPPORTUNITIES

Graduates are ready for employment in intercultural communication in a range of different contexts, such as cultural organisations and museums, national and European public institutions and international organisations and businesses. Possible career opportunities include:

- Foreign language correspondent
- International business liaison
- International public relations consultant
- Commercial agent
- Cultural consultant
- Translator or interpreter

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of Italian, English and logic as well as your familiarity with relevant themes in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.
- A **certified B2-level knowledge of Italian and a certified B1-level knowledge of English** are required.

LANGUAGE, CIVILISATION AND THE SCIENCE OF LANGUAGE

Language of instruction: 

Are you interested in languages, literature, foreign cultures and civilisations? Would you like to learn more about language science and how linguistic and cultural identities are constructed? This programme gives you the opportunity to strengthen your knowledge of at least two languages and possibly a third by choosing from more than 20 languages. Depending on the curriculum you choose, you can specialise in literature and culture, language science, or international politics. You can further develop and practice your skills by spending a semester or year studying abroad or by carrying out an internship at one of Ca' Foscari's many partner institutions.

CURRICULA

- International Politics 
- Linguistics, Philology and Language Teaching Research 
- Literatures and Culture 

LANGUAGES

- Three-year courses: Albanian, American English, Catalan, Czech, French, German, English, Italian Sign Language (LIS), Latin American Spanish, Modern Greek, Polish, Portuguese and Brazilian Portuguese, Romanian, Russian, Serbo-Croatian, Spanish, Swedish
- Single module courses: Basque, Bulgarian, tactile sign language

CAREER OPPORTUNITIES

Graduates are ready to work in various sectors, such as the management and enhancement of cultural heritage and education. Some of the career options available include:

- Translator
- Foreign language correspondent

- Public relations expert
- Tourism-related professions
- Cultural consultant

ENTRY REQUIREMENTS AND ADMISSION

- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required for all curricula except for those focusing on the English language, for which a B2-level knowledge of English is required. To enrol in the German stream, a B1 level in German is also required; no remedial classes are provided for beginners.

LINGUISTIC AND CULTURAL MEDIATION

Language of instruction: 

Would you like to work in linguistic and cultural mediation, in international communications or in tourism? This programme prepares you to do so with a professional approach, providing you with an interdisciplinary education that includes specific language courses for English and Spanish, international law and business economics. It also incorporates coursework addressing negotiation, translation and linguistics as well as the cultural and institutional characteristics of English- and Spanish-speaking regions. Thanks to the skills and knowledge you acquire, you can apply to be a linguistic

consultant, translator or interpreter, and you will be capable of assisting with international negotiations or contributing to the international development of an institution.

CAREER OPPORTUNITIES

Graduates are prepared for a varied range of employment opportunities:

- Interpreter
- Translator
- Tour guide
- Cultural/linguistic mediator
- Foreign language correspondent
- International advertising agent
- Commercial liaison
- Communication expert
- Event organiser
- Cultural consultant

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your linguistic aptitude and cultural knowledge in both Italian and English as well as your general knowledge of the history and geography of Spanish-speaking countries in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.

PHILOSOPHY

Language of instruction: 

This programme gives you a critical understanding of philosophy's principal themes and the issues that have arisen in their historical development while exploring them in connection with other disciplines and research fields, including psychology, the human sciences, education studies and the arts. It is the only university programme in Italy that reflects on the philosophical matters that are fundamental to our contemporary world and our increasingly globalised society. Two of the programme's defining components are its integration of the human sciences (psychology, anthropology) and its coursework in the education sciences. Thanks to the skills this programme helps you to develop, you will be ready to continue your education with a graduate degree or pursue a professional career in a variety of fields, including print and digital publishing and library and archive services.

CURRICULA

- Philosophy 
- Philosophy and History 
- Philosophy and Human Sciences 

CAREER OPPORTUNITIES

Graduates are equipped to undertake advanced studies in the fields of philosophical and social analysis and educational counseling. They can also move on to a first-level professional master's programme dealing with philosophy and philosophical counseling or with educational training and the science of cognition. Possible career fields include:

- Library and archive services
- Human resources
- Communication
- Advertising

ENTRY REQUIREMENTS AND ADMISSION

PHILOSOPHY, INTERNATIONAL AND ECONOMIC STUDIES

Language of instruction: 

This programme offers a flexible, international and multidisciplinary education that empowers you to analyse and interpret social, political and economic phenomena because it provides a solid logical-philosophical grounding, a familiarity with international realities and cultures, and a basic knowledge of the tools used to analyse the macroeconomic context, market behaviour and economic factors. The programme allows you to develop a critical understanding of philosophical, political and economic texts as well as the skills you need to be able to gather and communicate information about globalisation and to shape potential solutions for current issues. Thanks to the skills the degree provides, you will be equipped to pursue a wide range of professional careers in various fields, including international economics and international relations.

CAREER OPPORTUNITIES

Graduates may find employment as consultants in the international economics field or practice a profession in international relations with a specialised knowledge of economic-political phenomena and national institutions, working at either the ministerial or regional level, at chambers of commerce, at international institutions (OECD, World Bank, UN, etc.) or at private companies (for example, as an export manager or manager of international relations). Possible career opportunities include:

- Economic expert
- International relations expert
- Public relations consultancy
- International marketing
- Diplomatic core

- Public governance
- Cultural mediator

ENTRY REQUIREMENTS AND ADMISSION

- You must take an online written entry test that assesses your knowledge of logic and general culture in order to be evaluated for admission. When the test takes place depends upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.
- A **certified B2-level knowledge of English** is required.

SCIENCE AND TECHNOLOGIES FOR CULTURAL HERITAGE

Language of instruction: 

Do you want to become an expert in the conservation and restoration of cultural heritage? This programme prepares you for this by teaching you how to carry out technical and scientific investigations in order to understand what causes the deterioration of artistic, architectural and archaeological artefacts, to identify the appropriate restoration methodologies and to draw up conservation plans. During the first year, you acquire core competencies in chemistry, physics, mathematics and the history of art; in the second year, you participate in analytical and physical chemistry labs to master dexterity and gain hands-on experience by participating in restoration workshops, which continue in the third year. Upon graduation, you will have acquired an in-depth knowledge of the materials used in art and architecture, the impact that environment and context have on artefacts, and how to apply investigation methodologies in the effort to analyse and understand materials and evaluate their state of conservation.

CAREER OPPORTUNITIES

Graduates can find employment as experts in the diagnostics and conservation of cultural heritage at institutions specialising in cultural heritage management and conservation, as well as local agencies, companies and organisations operating in these fields. Career opportunities can be found in the following contexts:

- Museums and galleries
- Libraries and archives
- Art conservation and restoration
- Arts administration
- Heritage management

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics, abstraction and methodological accuracy in order to be evaluated for admission to the programme. For specific information about the right test for you, consult this programme's profile on [apply.unive.it](https://www.unive.it).
- A **certified B2-level knowledge of Italian and a certified B1-level knowledge of English** are required.

SOCIAL SCIENCES AND SOCIAL WORK

Language of instruction: 

This programme aims to understand social phenomena and sociological dynamics by applying an interdisciplinary approach. Over the course of three years, you gain legal skills (public, private and family law), a knowledge of the historical evolution and social development of society (economic structure, market economy, labour market, inequality, transformations of the family structure and relations, migration, democracy, welfare state), and a background in psychology (individual and collective processes, communication in aid relationships, psychological development and its socio-cultural context, psycho-social unrest, social and occupational psychology). This programme includes an internship supervised by professional social workers. Upon graduation, you will have the qualifications to plan and manage social initiatives.

CAREER OPPORTUNITIES

Graduates are trained to perform social work and intervention activities, operate on the territory as part of a network and comply with roles and duties as defined in the professional profile of social work. They may also sit professional licensing examinations that lead to the qualification of social worker. Career opportunities can be found in the following fields:

- Social work
- Rehabilitation and social integration
- Welfare administration
- Education and researcher
- Public administration
- NGOs

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your ability to understand, interpret and comment on texts dealing with contemporary social issues and phenomena in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on [apply.unive.it](https://www.unive.it).
- A **certified B2-level knowledge of Italian and a certified B1-level knowledge of English** are required.

SUSTAINABLE CHEMISTRY AND TECHNOLOGIES

Language of instruction: 

If you are interested in the experimental sciences, and specifically chemistry and its many applications, this programme is the right choice for you because it teaches you the basics of the field, how to articulate the production of new materials and how to facilitate sustainability. The programme provides you with core competencies in mathematics and physics and a strong theoretical and experimental foundation in chemistry. Workshops bring concepts to life and teach you how to carry out laboratory research. You can also personalise your study plan according to your own interests. Upon graduation, you will have essential know-how regarding the production, transformation, analysis and marketing of traditional and innovative materials with an emphasis on sustainability, environmental protection and safety. You will be equipped to work in the chemical, pharmaceutical, food, biotechnology, energy and new materials industries, or to pursue further education with a master's degree.

CURRICULA

- Chemical Science and Technology 
- Bio- and Nanomaterials Science and Technology 

CAREER OPPORTUNITIES

This programme trains professionals capable of acting as an interface between sustainable production and sustainable development. Their knowledge equips them to produce, transform and sell traditional and advanced products and materials, thus allowing them to contribute to the development of a chemical industry that is both "green" and sustainable. Possible career

opportunities include:

- Process and product design and development
- Scientific research consultancy
- Energy development
- Chemical manufacturing
- Chemical information management
- Pharmaceutical, food and environmental services

ENTRY REQUIREMENTS AND ADMISSION

- You must take an entry test that assesses your knowledge of mathematics science, logic and verbal comprehension in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on [apply.unive.it](https://www.unive.it).
- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required.

PRESERVATION AND MANAGEMENT OF CULTURAL HERITAGE

- Conservation Science and Technology for Cultural Heritage 
- Economics and Management of Arts and Cultural Activities  
- History of Arts and Conservation of Artistic Heritage 

ADVANCED COURSES

Like an undergraduate minor, Advanced Courses consist of two or three 6-credit modules, for a total of 12 or 18 credits. They are designed to deepen graduate students' understanding of particularly topical or impactful topics or themes, thereby expanding the knowledge and skills you acquire in your degree programme.

After passing all the modules that comprise an Advanced Course, you obtain a certificate and an Open Badge, a digital certificate describing the skills you have acquired that can be added to your curriculum vitae.

Advanced Courses can be offered in Italian or in English. Some of those recently taught in English include:

- Critical Histories of Management
- Financial Management and Corporate Reporting
- Organisation and Decision Making
- Strategy and Innovation Management

ADMISSION TO MASTER'S DEGREE PROGRAMMES

ENTRANCE QUALIFICATIONS

In order to enrol in a master's degree programme, you must have successfully completed an undergraduate degree involving at least three years of university study. If you obtained your degree outside Italy – whether you are Italian, an EU citizen or a non-EU citizen – you must undergo an online pre-evaluation of your credentials in order to confirm that you are eligible for admission to your chosen programme of study.

LANGUAGE REQUIREMENTS

Most master's programmes require you to have a certified minimum B2-level of knowledge (as defined by the Common European Framework of Reference for Languages, or CEFR) of your programme's language of instruction if you are not a native speaker. Italian-taught programmes generally also require a certified minimum B2-level knowledge of English. To prove your level of Italian, if you are not an EU citizen and you reside outside Italy, you must obtain one of the certificates recognised by the Italian Ministry of Universities and Research (MUR) or take the Italian language test that Ca' Foscari arranges in Venice shortly before the beginning of the academic year. You can find more information about language requirements on the specific web page of the programme that interests you.

ADMISSION

In order to ensure that you are prepared for graduate studies, a Teaching Committee must assess your educational background and personal experience by evaluating your undergraduate transcript of records and your curriculum vitae. To provide these documents, you simply upload them to Ca' Foscari's online application platform at apply.unive.it. If the Teaching Committee's assessment is positive, applicants to programmes without an admission cap can proceed directly with the enrolment process while those applying to a programme with limited enrolment must take part in a pre-enrolment selection process by taking an entry test.

Depending on whether you are an EU or non-EU citizen, the entry test procedure may vary. For specific details about the entrance requirements and, if relevant, the entry test procedure of the degree that interests you, consult the online profile of the relevant programme at apply.unive.it.

Interdisciplinary programmes appear in more than one study area.

ACCOUNTING AND FINANCE

Language of instruction: 

Would you like to dive deeper into the study of economics and business with an emphasis on the administrative and financial management of companies of all sizes and diverse business sectors? This programme facilitates this by equipping you with the skills you need to work as an administrative or financial manager, controller, internal auditor, or risk manager. An in-depth study of the legal field also guarantees the necessary skills for the management of extraordinary finance operations and the exercise of professional services. You can put these skills to the test thanks to agreements with Venice's Order of Chartered Accountants and Accounting Experts and Vicenza's Order of Labour Consultants. You can start your professional training during your second year and will be exempt from the first session of Italy's state exams. This programme turns you into an expert in accounting data, planning management control systems, organising financial strategies and auditing business risks. Depending on the curriculum you choose, you can investigate different aspects relating to the profession or internal business management.

CAREER OPPORTUNITIES

This programme offers an effective grounding for operating within companies and local authorities, holding positions related to corporate accounting and finance including management control.

Possible career opportunities include:

- Manager
- Finance and business consultant
- Corporate finance specialist
- Accountant
- Tax professional

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- You must take an entry test that assesses your knowledge of economics in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.
- A **certified B2-level knowledge of both Italian and English** is required.

ANCIENT CIVILISATIONS: LITERATURE, HISTORY AND ARCHAEOLOGY

Language of instruction: 

This programme trains you as an expert in philology, ancient literatures, ancient history and archaeology. Depending on the curriculum you choose, you acquire specialised skills and methods in archaeology, ancient art and material culture history, languages and literatures of ancient Greek and Latin civilisations or ancient history (including Greek, Roman and ancient East history). Your academic activities benefit from state-of-the-art technologies and methodologies (e.g., digital humanities), allowing you to access texts and archives online and to use specifically designed analytical software. You can further explore your field of interest through excavation experiences, internships in epigraphy, digital humanities workshops and museum internships. Upon graduation, you will be able to assume a position of responsibility in institutions such as museums, local administration, archives, publishing houses, or obtain teaching qualifications for middle and secondary schools.

CURRICULA

- Ancient Philology, Literatures and History 
- Archaeology 

CAREER OPPORTUNITIES

Depending on their chosen curriculum, graduates are prepared for managerial positions at such institutions as archaeological superintendence offices, museums, offices in charge of cataloguing, documentation and restoration, and excavation associations or cooperatives. Potential career opportunities include:

- Public administration manager
- Archeologist
- Historian

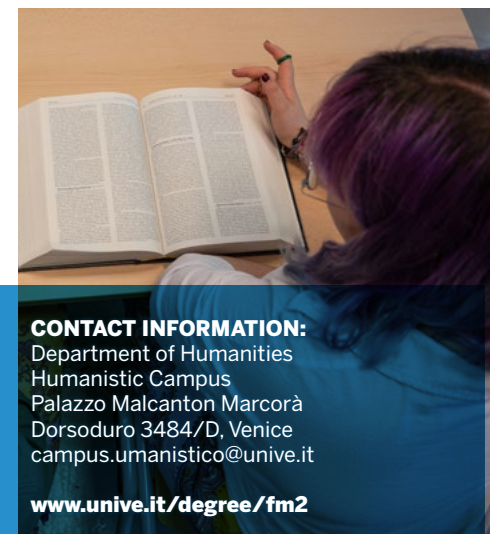

- Art expert
- Linguist or philologist
- Publishing professional
- Museum curator

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

ARCHIVAL AND LIBRARY SCIENCE

Language of instruction: 

This programme is offered jointly with the University of Padua and trains you to be an archivist or librarian by providing you with an in-depth academic understanding of the treatment of the various materials conserved in archives, libraries and documentation centres. The programme's educational approach addresses theoretical, practical and methodological issues, and teaches you methods for the dissemination, enhancement and communication of archival and bibliographic information as well as how to use the main software and electronic communication tools employed in the archival and library sciences. The degree provides all of the skills and knowledge you need for positions of responsibility in both public and private archives, libraries and documentation centres.

CAREER OPPORTUNITIES

Graduates are prepared to take on managerial positions at institutions and organisations involved with the production, management, conservation, enhancement or communication of archival and bibliographical heritage. Career opportunities can be sought in the following fields:

- Museum curation and management
- Library and archive services
- Publishing and journalism
- Government agencies
- Public and private organisations focused on archival and bibliographic heritage
- Research and education

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

BIOTECHNOLOGIES FOR SUSTAINABLE DEVELOPMENT AND THE ENVIRONMENT

Language of instruction: 

This programme trains you to be a professional capable of working to protect the environment and implement the use of renewable energies by preparing you to design, plan, evaluate, manage and control the kinds of systems, processes and services linked to these activities. The curriculum explores the different applications of environmental processes and applied research with a quantitative approach. It particularly focuses on ways to transform materials and energy that maximise production yield and minimise risk and environmental impact with a view to achieving environmental – but also economic and social – sustainability and implementing the circular economy concept. Through the programme, you develop relevant skills thanks to the multidisciplinary yet practical approach employed. The course combines disciplines such as industrial, mechanical and energy engineering, analytical chemistry, applied microbiology, the assessment of risks and environmental impacts throughout the life cycle of products and processes, environmental law and the economy of multi-utilities. Graduates acquire the skills they need to work in the field of industrial biotechnologies linked to the promotion of renewable resources and renewable energies, with regard to both the chemical, microbiological and engineering aspects of conversion and production processes, and to assess the environmental impact that these processes can produce.

CAREER OPPORTUNITIES

Graduates typically find work in fields relating to the innovation and development of products and processes and the evaluation and management of complex systems, either as freelance professionals or by working for service providers and public authorities. Graduates are prepared to launch careers as researchers or specialists at laboratories and public and private research and development institutions operating in chemical industries, the biotechnology industry for biomass processing or multi-utility companies involved with industrial and environmental biotechnologies. They can also supplement their preparation with a teacher training course in order to become an upper secondary school science teacher.

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

COMPARATIVE INTERNATIONAL RELATIONS

Language of instruction:  or 

This degree is the only international relations programme in Italy that combines the study of languages and foreign cultures, law and international economics. It immerses you in linguistic and cultural studies regarding Europe, Asia and the Atlantic world, which Ca' Foscari has done since its founding. The curriculum offers solid linguistic training, legal knowledge and economics courses as well as in-depth comparative studies on the political, cultural, geographic and sociological fields through study programmes on specific geopolitical areas. The skills you gain will allow you to assume a position of responsibility in international offices and organisations, private companies that operate in the international market, public administration and territorial entities, national and international organisations in international corporations, in consular offices, institutions, entities, agencies and foundations.

CURRICULA

- Americas 
- East Asia 
- Eastern Europe 
- European Union Studies 
- Global Studies 

CAREER OPPORTUNITIES

Graduates will be able to find employment with businesses and organisations operating in international markets, with local government and regional bodies, and with national and international institutes, agencies, foundations and study centres. Career opportunities can be found in the following fields, among others:

- Image management
- Public relations consultancy
- Journalism and broadcasting
- International marketing
- Public service

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- For the Global Studies and European Union Studies curricula, a **certified B2-level knowledge of English** is required; for the other curricula, a **certified B2-level knowledge of both Italian and English** is required.
- **A B1-level knowledge of one of the following languages** is required for admission: Brazilian/Portuguese, Chinese, French, German, Japanese, Russian, or Spanish.

COMPUTER SCIENCE AND INFORMATION TECHNOLOGY

Language of instruction: 

This English-taught programme offers you a broad spectrum of knowledge and skills regarding the methods, tools and enabling technologies employed in software design and development, artificial intelligence and cybersecurity. The degree teaches you statistical techniques, machine learning and how to design reliable software with a particular focus on security, correctness and performance. This general knowledge is then reinforced with an area of specialisation through the selection of one of the three available curricula, preparing you for employment in the rapidly growing industrial sectors of production and services, particularly Big Data & Analytics, Cybersecurity, Cloud and IoT. After completing the programme, you will be proficient in software design, data management and analysis, informatics systems and computer networks.

CURRICULA

- Artificial Intelligence and Data Engineering 
- Cybersecurity 
- Software Development and Engineering 

CAREER OPPORTUNITIES

Graduates have the skills required for working in the fields of software creation, artificial intelligence and data analysis and can seek employment with manufacturing companies dealing with information systems and processor networks and with companies, local authorities and laboratories that employ complex information systems and analysis methods at both the national and international levels. Possible career opportunities include:

- Artificial intelligence specialist
- Software analyst and developer

- Information security specialist
- System analysis
- System administrator
- Web application developer and analyst
- Database developer and analyst
- Information and network specialist
- Data engineering and management expert

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- A **certified B2-level knowledge of English** is required.

CONSERVATION SCIENCE AND TECHNOLOGY FOR CULTURAL HERITAGE

Language of instruction: 

This programme is taught entirely in English and trains experts in cultural heritage conservation with a strong interdisciplinary approach (chemistry, physics, biology, computer science, geology) and emphasises hands-on experience with innovative conservation technologies. At the end of the programme, you will possess the qualifications you need to become a conservation scientist, a technical and scientific expert in the conservation of cultural heritage. You will be able to design and use new restoration and conservation technologies, develop and design prevention and maintenance projects and carry out investigations of artefacts in a conservational context.

CAREER OPPORTUNITIES

Graduates can find employment with public and private organisations as well as businesses and laboratories specialising in restoration and conservation. They can also carry on with their studies at the doctoral level in chemical science. Possible career opportunities include:

- Museum technician
- Restorer
- Cultural consultant
- Restoration technology development

ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of English** is required.

campus.scientifico@unive.it

www.unive.it/degree/cm60

CULTURAL ANTHROPOLOGY, ETHNOLOGY, ANTHROPOLOGICAL LINGUISTICS

Language of instruction: 

This master's degree is carried out in collaboration with the nearby University of Padua and provides you with the toolbox of knowledge and skills that you need in order to be able to analyze contexts characterized by rapid cultural transformation as a result of contemporary cultural phenomena (conflict, migration, ethnicity issues, environmental sustainability challenges, the impact of tourism, post-colonial and neo-colonial contexts and the new cultural syntheses that derive from these factors) – a toolbox that is increasingly necessary in our complex multi-ethnic societies, especially in contexts undergoing processes of urbanization, migration, or impoverishment and the effects to which these dynamics can give rise. The course of study equips you with a solid ethnographic and ethno-linguistic preparation, paying particular attention to anthropological methods and methodologies, their consequences and their associated ethical issues. The study plan is designed to ensure an awareness of and an academic dialogue with the historical-geographic, linguistic and sociological fields with a particular focus on Asia, but also through the exploration of other geographic regions (Africa, South America, the Pacific region and North America).

The programme offers a wide range of opportunities for satisfying the curricular internship requirement, allowing you to access internships at both public and private institutions in Italy or abroad that operate in the fields of migration, museums or international cooperation.

CURRICULA

- Cultural Anthropology 
- Anthropology of Asia 
- Environmental Anthropology 

CAREER OPPORTUNITIES

Graduates are ready for employment with governmental agencies, international organisations and NGOs and other institutions involved in: the enhancement of cultural heritage; social, educational, health care and school services; or regional planning, co-operation and development, with a special focus on immigration issues. Possible career opportunities include:

- Anthropologist
- Linguist or philologist
- Museum and cultural event curator
- Journalist

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

DATA ANALYTICS FOR BUSINESS AND SOCIETY

Language of instruction: 

The course is designed for students who have studied economics or business and who have a strong interest in quantitative methods and the use of big data with the purpose of maintaining and increasing the competitive advantage of businesses.

The programme provides the data processing skills required to interpret and analyse complex phenomena in the fields of economics, strategy, marketing, human resources, finance, accounting and the social sciences in general. Furthermore, the programme ensures the acquisition of advanced skills in machine-learning techniques that permit the extraction of predictive patterns and models from digital data.

The programme explores two branches of study, "Business Application" and "Fintech and Bigtech", and the syllabus emphasises computer technologies, AI learning methods, statistical learning methods and mathematical optimisation methods for supporting decisions and risk analysis.

CAREER OPPORTUNITIES

As trained specialists in data analysis for business, graduates of the programme are equipped to work in a variety of fields, including: businesses of any size operating in the industrial sector or manufacturing that employ the analysis of data as a source of information in the shaping of their production processes; businesses and organisations focused on the development and management of innovative data-based services; finance-related businesses and organisations, such as banks, insurance companies, consulting companies; and professional organisations focused on consulting or analysis.

As graduates are also trained specialists in data

analysis for society, they are equally prepared to find employment in public or private organisations or businesses that make use of data analysis.

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- You must take an online written entry test that assesses your knowledge of economics in order to be evaluated for admission. When the test takes place depends upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.
- A **certified B2-level knowledge of English** is required.

DOUBLE/JOINT DEGREE AVAILABLE

DIGITAL AND PUBLIC HUMANITIES

Language of instruction: 

This innovative study programme integrates the humanities and IT disciplines and equips you to support the promotion and dissemination of culture by helping you to become an expert in the design, production and enhancement of web resources and in the digital management of cultural resources. The areas of study explored by the programme include computer science, linguistics and literature, history, law, art and archiving. Lectures are combined with practical laboratory activities in collaboration with the Venice Centre for Digital and Public Humanities at Ca' Foscari. The study plan also includes a 250-hour internship to be carried out at a company or external organisation/institution either in Italy or abroad whose purpose is to provide you with the professional and technical skills you will need in for launching a career in the working world or continuing with academic research.

CAREER OPPORTUNITIES

Graduates are prepared to assume positions of responsibility in activities connected to the service sector, the culture industry, cultural institutes and specific centres, such as specialist electronic publishing, the management, presentation and enhancement of cultural heritage/resources, intercultural activities and activities tied to user interaction through social media and social networks. Some of the possible professional roles open to them include:

- Expert in the design, production and enhancement of online resources
- Expert in the digital management of cultural resources
- Public Humanities expert

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- A **certified B2-level knowledge of English** is required.

ECONOMICS AND FINANCE

Language of instruction: 

This programme equips you to deal confidently with the principal economic and financial issues thanks to the solid theoretical, quantitative and legal preparation it provides. specialist knowledge in a wide range of areas, including: financial markets; the main areas of management of financial intermediaries (credit, finance, treasury, securities, organisation, planning and control); the management of financial investments; the measurement and management of financial risk; financial advice and insurance; supplementary pension schemes and the management of pension funds; the organisation of the internal processes; and the administrative management of banks and financial intermediaries in general.

As an Economics and Finance student, you will be able to apply for double degree programmes, participate in the Bloomberg Lab and other associated courses and earn CFA and AIAF (Italian Society of Financial Analysts) certification.

CAREER OPPORTUNITIES

As a graduate specialised in economics and finance, you can pursue the path of self-employment, which would require qualification, or launch a career via employment in one of the following contexts:

- commercial banks, investment banks, insurance firms or other financial institutions
- mutual investment funds, pension funds, insurance portfolios or hedge funds
- asset management, treasury of non-financial companies, debt-collection agencies
- supervisory authorities, independent administrative authorities in general and management companies of organised markets
- consultancy firms

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- You must take an entry test that assesses your general knowledge of mathematics as well as your specific knowledge of themes relevant to the degree programme in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors,

including whether you are an EU citizen or not. For information about the right test for you, consult this programme's profile on apply.unive.it.

- A **certified B2-level knowledge of both Italian and English** is required.

DOUBLE/JOINT DEGREES AVAILABLE

- Double degree with Aix-Marseille Université (France)
- Double degree with Université Paris Dauphine (France)

- Double degree with Stevens Institute of Technology (USA)
- Double degree with Henley Business School, University of Reading (UK)
- Double degree with City College London (UK)

ECONOMICS AND MANAGEMENT OF ARTS AND CULTURAL ACTIVITIES

Language of instruction:  or 

Do you want to work in the field of artistic heritage and cultural management? This programme trains you to understand the nature and processes of cultural production, interconnecting the professional worlds of management and culture. The lectures, teaching approach and structure of this programme allow you to identify and exploit new connections between culture and business by exploring the exciting relationship between creativity and innovation. You can also apply the knowledge the degree provides by taking advantage of internship opportunities that prepare you to enter the work force.

CURRICULA

- Economics and Management of Arts and Cultural Activities 
- Economics and Administration of Arts and Culture 

CAREER OPPORTUNITIES

Graduates can pursue careers as managers responsible for the planning and organisation of cultural activities and events with companies, cultural institutions and government agencies. Possible career opportunities can be found in the following fields:

- Cultural projects management
- Conservation and enhancement of the arts
- Communications
- Arts management
- Economic consulting

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- For the Economics and Management of Arts curriculum, a **certified B2-level knowledge of both Italian and English** is required.
- For the Economics and Administration of Arts and Culture curriculum, a **certified B2-level knowledge of English** is required.

ECONOMICS, FINANCE AND SUSTAINABILITY

Language of instruction: 

This programme equips you to deal confidently with the principal economic and financial issues thanks to the solid theoretical, quantitative and legal preparation it provides. Three curricula are available, all taught entirely in English. The Economics-QEM curriculum focuses on the in-depth study of two areas: economic issues in both the microeconomic and macroeconomic contexts; and quantitative methods for the theoretical and empirical analysis of these issues. If you choose this module, there is the opportunity to apply to participate in the Erasmus Mundus programme (QEM).

The Quantitative Finance and Risk Management curriculum provides you with specialist knowledge in a wide range of areas, including: financial markets; the main areas of management of financial intermediaries (credit, finance, treasury, securities, organisation, planning and control); the management of financial investments; the measurement and management of financial risk; financial advice and insurance; supplementary pension schemes and the management of pension funds; the organisation of the internal processes; and the administrative management of banks and financial intermediaries in general. In opting for one of these two curricula, you would be able to apply for double degree programmes, participate in the Bloomberg Lab and other associated courses and earn CFA and AIAF (Italian Society of Financial Analysts) certification.

The Sustainable Finance curriculum focuses on the field of finance with an accent on sustainability and the various opportunities that the ever increasing interest in the impact of climate change and the achievement of

global development goals is generating. The study plan ensures you acquire a command of the tools used to measure, understand and manage sustainability initiatives while taking into consideration both risks and opportunities as seen through the lenses of individual institutions and of the broader economic and financial system.

CURRICULA

- Economics – QEM 
- Quantitative Finance and Risk Management 
- Sustainable Finance 

CAREER OPPORTUNITIES

For graduates specialising in economics, employment opportunities as economists can be sought at:

- research centres, universities, and national and international bodies and in companies that operate on international markets
- consultancy companies, non-profit organisations, the authorities regulating and protecting competition and markets, economic publications and companies that operate on international markets

Specialists in economics can also assume operational roles in the support of analysis and decisions at:

- economic intervention agencies (local, national and supranational authorities, ministries and economic bodies)
- support structures and institutions for market operators (consultancy centres, research and business marketing offices)

For those with a specialisation in finance, there is

the possibility of self-employment, which would require qualification, or launching a career at one of the following:

- commercial banks, investment banks, insurance firms or other financial institutions
- mutual investment funds, pension funds, insurance portfolios, hedge funds; asset management, treasury of non-financial companies, debt-collection agencies
- supervisory authorities, independent administrative authorities in general and management companies of organised markets
- consultancy firms

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average). For more information about the format and timing of this evaluation process, consult the programme's profile on apply.unive.it.
- A **certified B2-level knowledge of English** is required.

DOUBLE/JOINT DEGREES AVAILABLE

- Double degrees with Aix-Marseille Université (France)
- Double degree with Université Paris-Dauphine (France)
- Joint degree in collaboration with Université Pantheon– Sorbonne – Paris 1 (France); Universitat Autònoma –Barcelona (Spain); Université Catholique de Louvain (Belgium); Warsaw School of Economics (Poland)
- Double degree with Stevens Institute of Technology (USA)
- Double degree with Henley Business School, University of Reading (UK)

ENGINEERING PHYSICS

Language of instruction: 

Would you like to be someone who helps sustainable technology research take important leaps forward? Do you want to work as a scientist and engineer in the fields of biomedicine and finance? To help you achieve these goals, this programme offers three innovative curricula in the fields of modern physics and engineering and the science of complex systems. All three curricula are pioneering, offering an educational experience not yet available elsewhere, and they are designed to shape the next generation of academics and professionals capable of tackling the challenges of the twenty-first century. The curriculum in Quantum Science and Technology trains you to be an expert in the fields of modern physics, computer science, electronics and telecommunication systems, preparing you for a career at a high-tech company or research institute.

The curriculum focusing on the Physics of Finance and Economics is offered in collaboration with Ca' Foscari's Department of Economics. It will make you an expert with both a strong physics background and the ability to apply this background in the fields of sustainable finance and economics.

The Physics of the Brain curriculum is carried out in collaboration with the International School for Advanced Studies in Trieste (Scuola Internazionale Superiore di Studi Avanzati, or SISSA), where part of your training takes place. This curriculum is designed to allow you to apply a strong training in physics to the study of the human brain by equipping you with expertise in the use of experimental and theoretical tools for the investigation of any biological systems. The toolkit you acquire prepares you to work at

companies and research institutes focusing on biomedical applications, and upon completing your studies, you receive not only your master's degree diploma, but also a diploma issued by the SISSA.

CURRICULA

- Quantum Science and Technology 
- Physics of Finance and Economics 
- Physics of the Brain 

CAREER OPPORTUNITIES

Depending on the curriculum you choose, this degree programme prepares you either to continue on an academic path with doctoral studies in physics, the biosciences, or finance, or launch a professional career. Some of the most popular professions include:

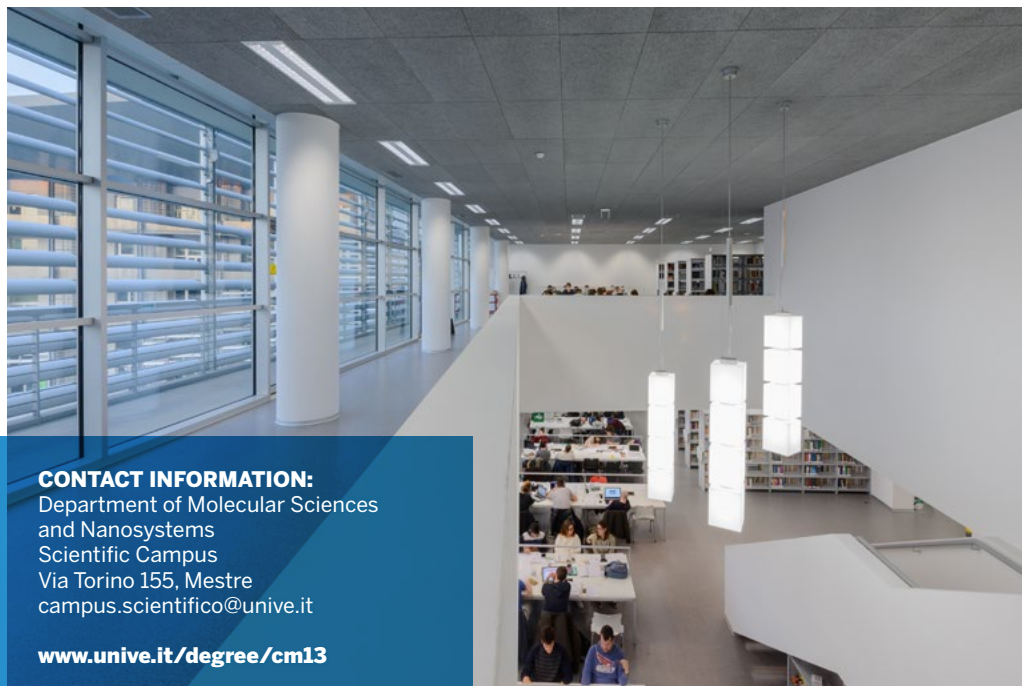

- IT and business consultancy professionals
- Managerial or technical roles in R&D and/or production at microelectronics and automation companies
- Managerial or technical roles in R&D and/or production at biomedical companies
- Data scientists at high-tech companies and research institutes
- Data analyst at investment banks
- Research scientist in scientific, medical or financial research centres

ENTRY REQUIREMENTS AND ADMISSION

- All candidates are assessed to confirm their possession of the minimum curricular and experiential requirements as well as their general knowledge of mathematics, classical physics, modern physics, information engineering and computer science. If you

wish to apply for the Physics of the Brain curriculum, you must also demonstrate a specific knowledge of biology. For more information about the timing and format of this assessment, consult this programme's profile on apply.unive.it.

- A **certified B2-level knowledge of English** is required.

ENVIRONMENTAL HUMANITIES

Language of instruction: 

This programme explores the role that the humanities are required to play in order to have a positive impact on our ability to tackle the global challenge of climate change and foster greater ecological awareness. The Environmental Humanities are an essential area of research capable of creating a fruitful dialogue between the natural sciences, the social sciences and humanistic culture in all its forms, and their aim is to equip you and the other leaders of tomorrow with the ability to imagine, discuss and educate others regarding a sustainable future for the Earth's ecosystem. To achieve this, the programme's course of study focuses on the careful analysis of local and global socio-cultural dynamics through the application of a multidisciplinary approach that seeks to overcome the traditional dichotomy between answers to environmental problems that emerge from disciplines related to "nature" and those that emerge from considerations of "culture". In an era that is ever more characterised by complex multi-ethnic societies and migratory phenomena caused by climate change, the programme course addresses environmental issues from a global and intercultural perspective in order to enhance the relationship models between humans, non-human species and the biosphere that are typical of different societies, also from a historical point of view.

The history and location of Venice makes Ca' Foscari a particularly special place for the development of Environmental Humanities. A historic crossroads of civilisations yet also a famously fragile city affected by global tourism and climate change, Venice facilitates and encourages critical reflection and creative responses. The

course therefore also explores the context of the Venetian lagoon's ecosystem and the interaction with the city's cultural and artistic scene, under the guidance of professors, external professionals and environmental scientists.

CAREER OPPORTUNITIES

Graduates are equipped to launch careers at both public and private institutions around the world, whether these be educational, environmental or cultural in focus. Some of the roles they are prepared to assume include:

- Environmental educator
- Environmental consultant
- Creator and curator of cultural activities regarding the environment
- Expert in cultural mediation and communication

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements. They will also be evaluated on the basis of their academic history and a brief essay prepared on specific themes.
- A **certified B2-level knowledge of English** is required.

ENVIRONMENTAL SCIENCES

Language of instruction:  or 

This programme provides you with an elevated qualification and specialisation in the following fields: the application of investigative methodologies and the design of recovery operations and environmental rehabilitation; the evaluation of environmental resources; the regional management and planning of coastal marine systems; the evaluation and management of climate change issues and the dynamics of the Earth system; and environmental interest technologies and cleaner products and processes. The programme offers three distinct curricula: Global Environmental Change (entirely taught in English); Control and Environmental Rehabilitation; and Evaluation and Management of Environmental Systems. The programme incorporates both laboratory and field experiments of an interdisciplinary nature and offers international internship opportunities. Upon graduation, you will have the necessary skills to assume a position as a highly qualified specialist or consultant in different industries or to work in international environmental protection.

CURRICULA

- Global Change and Sustainability 
- Monitoring and Environmental Rehabilitation 
- Natural Capital and Ecosystem Services 

CAREER OPPORTUNITIES

Graduates are highly qualified specialists capable of tackling the prevention, diagnosis and resolution of environmental issues thanks to their multidisciplinary skill set. They are equipped

to assume positions of responsibility in project and facilities management. Possible career opportunities include:

- Environmental change expert
- Agriculture and forestry management expert
- Geologist
- Biologist
- Botanist
- Ecologist
- Zoologist

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- For the Global Change and Sustainability curriculum, a **certified B2-level knowledge of English** is required; for the other curricula, a **certified B2-level knowledge of both Italian and English** is required.

DOUBLE/JOINT DEGREE AVAILABLE

Joint master's degree with Karl-Franzens Universität Graz (Austria); Universität Leipzig (Germany); Universiteit Utrecht (Netherlands). The selection procedure is managed by a consortium through a dedicated portal: www.jointdegree.eu/de/sustainable-development

EUROPEAN, AMERICAN AND POSTCOLONIAL LANGUAGE AND LITERATURE

Language of instruction:  or 

This programme allows you to deepen your knowledge and understanding of the languages, literatures, and cultures of European and American postcolonial countries according to the curriculum you choose: American, French, German, Iberian, Slavic and Balkan Studies. During your studies, you will develop an advanced knowledge of the history of literary language and the culture of the studied civilisations and gain a strong competence in one of the languages that you study. Thanks to collaborations with foreign universities that allow you to obtain joint degrees or double diplomas, the programme is markedly international in nature. At the end of your degree, you can pursue further studies or assume positions in the field of Italian and international entrepreneurship in public and private institutions.

LANGUAGES

Albanian, Anglo-American, Czech, English, French, German, Modern Greek, Polish, Portuguese and Brazilian, Romanian, Russian, Serbo-Croatian, Spanish, Swedish.

CURRICULA

- Literatures and Cultures Concentrations:
 - American Studies 
 - English Studies 
 - French Studies 
 - German Studies 
 - Iberian Studies 
 - Scandinavian Studies 
 - Slavic and Balkan Studies 

- English and American Literary and Cultural Studies (European Joint Master's Programme) Concentrations:
 - Literary Studies
 - Cultural StudiesPlease check the admission procedure on the programme web page.
- Estudios Ibéricos e Iberoamericanos (double degree) Please check the admission procedure on the programme web page.
- Etudes Françaises et Francophones (double degree) Please check the admission procedure on the programme web page.
- Russian Studies (double degree) Please check the admission procedure on the programme webpage.

CAREER OPPORTUNITIES

Thanks to the skills and knowledge the programme provides, graduates are prepared to continue their academic career with a doctoral degree or to seek employment with national or international businesses and at public and private institutions and organisations. Career opportunities can be pursued in the following fields:

- Image management and public relations consultancy
- Interpreting
- Translation
- Linguistic/philological research or consultancy
- Archives
- Libraries
- Museum curation

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- Each joint and double degree has its own distinct admissions procedure; for more information, visit the relevant programme web page.
- For the language requirements of each curriculum or double/joint degree programme, please check the relevant programme web page.

DOUBLE/JOINT DEGREES AVAILABLE

This master's degree trains professional and managerial figures capable of interpreting the dynamic international economic environment and responding to the most evolved needs of the labour market. To achieve this, it provides you with a solid background in the topics of finance, control and international accounting, integrating this knowledge with an understanding of sustainability and digitisation.

The programme's study plan develops your skills in strategic planning, corporate reporting, management control, financial policies, and investment strategies, facilitating your capabilities in the rational management of organisations and ensuring that you possess a profound

understanding of the financial markets, which are undergoing profound global changes. More specifically, the course is designed to combine the indispensable knowledge and skills required for optimal strategic, administrative and financial management with a rich awareness of the evolutionary trends that are significantly influencing business operations, particularly the sustainability of processes and the use of digital technologies and data analytics.

CAREER OPPORTUNITIES

This programme prepares you as a professional ready to assume administrative-managerial roles in both private and public organisations of

any size which value and require international expertise.

As a Global Accounting and Finance graduate, you could pursue a wide range of careers,

including:

- Certified public accountant
- Auditor
- Financial analyst, asset manager, risk manager, expert in real and financial investment selection
- CFO – Chief Financial Officer
- Administrative manager
- Controller
- Internal auditor
- CAO – Chief Administrative Officer

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- You must take an online written entry test that assesses your general knowledge of mathematics as well as your specific knowledge of themes relevant to your chosen curriculum in order to be evaluated for admission. When the test takes place depends upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.
- A **certified B2-level knowledge of English** is required.

GLOBAL DEVELOPMENT AND ENTREPRENEURSHIP

Language of instruction: 

If you are passionate about the complex mechanisms of the global market or if you have an entrepreneurial spirit, this programme will put you on the right path. Taught entirely in English, it offers you the tools you need to engage with international markets, especially emerging ones, and to understand business growth processes in an international context. The programme gives you the opportunity to meet and learn from successful entrepreneurs and the directors of Italian and foreign companies. You can also gain international experience by applying to carry out a double degree with the École Management Strasbourg in France. The programme provides study grants for entering the work force thanks to the Luciano Iglesias Foundation.

CURRICULA

- Global Markets 
- Entrepreneurship 

CONTACT INFORMATION:

School of Economics,
Languages and Entrepreneurship
Treviso Campus
Riviera Santa Margherita 76, Treviso
campus.treviso@unive.it

www.unive.it/degree/em12

CAREER OPPORTUNITIES

Graduates of the programme are prepared to launch a career as international markets experts; foreign sales managers; export managers; managers of administration, finance and control in global player enterprises; venture capitalists; entrepreneurs with a strong inclination towards international markets; or consultants in the internationalisation of enterprises and business networks. Employment opportunities can be found in the following fields:

- Commercialisation and promotion of goods and services
- Commercialisation of information technology and communication
- Purchasing of goods and services
- Market analysis
- Economic systems analysis

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- A **certified B2-level knowledge of English** is required.

DOUBLE/JOINT DEGREES AVAILABLE

Double degree with the École Management Strasbourg (France)

GOVERNANCE OF PUBLIC ORGANISATIONS

Language of instruction: 

This programme develops the theoretical and technical expertise you need to work in the management of public administration (local, regional, national and international) and both non-profit and for-profit organisations operating in areas of public interest. It equips you to encourage the innovation and modernisation that are so essential to our response to the social and economic changes that society is experiencing today.

The curriculum helps you acquire a wide range of knowledge and expertise in economics and business, statistics and IT, law, organisation and sociology. Highly innovative teaching ensures you also acquire transferable skills by incorporating engagement and interaction with different external bodies, thereby preparing you to tackle the main innovative challenges – such as de-bureaucratisation, digitisation and sustainability – that public organisations are facing now or will have to grapple with in the near future.

Although the programme does not focus on any one specialisation, its content is flexible, allowing students to adopt different pathways in order to carry out more in-depth study in any of the four areas it addresses (quantitative studies, economics/business, law and sociology/organisation).

CAREER OPPORTUNITIES

Thanks to the programme's interdisciplinarity, graduates are able extremely independent and ready to carry out all of the tasks and professional activities required to work in institutions of public administration, supervisory and control bodies and all public and private enterprises involved with public administration.

Graduates are capable of interacting with both managers and technicians operating in various areas (legal, quantitative, managerial), as well as with strategic figures and policy makers. Furthermore, they are prepared to assume coordination responsibilities or take on professional roles in senior management. Career opportunities can be sought in the following contexts:

- Public service agencies
- NGOs
- International organisations
- Economic and financial consulting
- Legal consulting
- Human resources management
- Public administration management

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of Italian and a certified B2-level knowledge of English** are required.

HISTORY FROM THE MIDDLE AGE TO PRESENT

Language of instruction: 

This programme provides the skills you need to become a historian or a curator in an archive, library or museum by exploring the history of cultures and religions as well as anthropology and sociology. Once enrolled, you can also apply for one of the three joint degrees offered in France and Argentina. The programme equips you with a complete knowledge of reading methodologies, preparing you to analyse different types of literary, documentary, archival, iconographic and monumental materials as well as the survey techniques of studies focusing on primary sources. These skills are essential for professional training in the fields of communication, teaching and the dissemination of academic knowledge, and the programme helps to further their development with workshops organised in museums, archives and libraries.

CAREER OPPORTUNITIES

Graduates can employ the knowledge and skills acquired through the programme by seeking employment of a variety of kinds. Possible career paths include:

- Historian
- Museum curator
- Publisher
- Journalist or writer
- Researcher or teacher
- Archive specialist

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

HISTORY OF ARTS AND CONSERVATION OF THE ARTISTIC HERITAGE

Language of instruction: 

Since the conservation of artistic heritage requires a well-rounded education involving an in-depth knowledge of artistic phenomena, this programme provides you with a thorough familiarity with the history of art and artistic techniques from the Middle Ages to the modern day while enabling you to choose a specialisation based on your own personal interests. Educational activities, often taking the form of interactive seminars, equip you to carry out rich analyses of focused aspects of the history of art. The programme also gives you the opportunity to discover and gain experience in important cultural institutions through internships. And

thanks to the skills the programme provides, you will be able to assume positions of responsibility in cultural heritage studies, conservation and management contexts, as well as in cataloguing, cultural event/exhibition organisation and the design of cultural and educational activities.

CURRICULA

- Medieval and Byzantine 
- Modern 
- Contemporary 

CAREER OPPORTUNITIES

Graduates are equipped to assume managerial positions at public and private institutions involved in the study, classification, safeguarding, conservation, enhancement and management of historical artistic heritage. Possible career opportunities include:

- Historian
- Art expert
- Museum curator
- Artistic director

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

DOUBLE/JOINT DEGREE AVAILABLE

- Double degree with the Université de Tours (France)
- IMACS - International Master in Cinema Studies Diploma supplement

INNOVATION AND MARKETING

Language of instruction: 

This degree programme trains you to become a professional with high-level skills in the management of the relationship between companies and the market, equipping you with to handle the competitive challenges posed by innovation. Marketing managers must be able to anticipate and quickly grasp the weak signals of market changes in order to be able to respond proactively to new needs, a skill that is essential to success in today's highly turbulent economic environment, especially in terms of the fast reaction times required by new technologies. As a result, this degree programme supplements basic skills related to marketing management with a nuanced understanding of the innovation process. The study plan ensures that you acquire the analytical, IT, brand (company or product) management, communication and marketing skills – as well as the soft skills and leadership capabilities – that are needed to help companies cope with the changes of an increasingly interconnected, international and competitive market.

CAREER OPPORTUNITIES

As a graduate, you will be prepared to work in medium- to large-sized manufacturing companies, multinational organisations, and service and consultancy companies, taking on tasks related to communication, marketing and social media marketing, the development of innovative projects, and the organisation and management of events. Thanks to the skills you acquire during your studies, you could pursue a wide range of careers, including:

- Social media manager
- International marketing manager
- Brand manager
- Marketing specialist and business developer in

- consulting companies
- Adv specialist and strategic planner in communication agencies
- Marketing consultant, freelancer

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- You must take an online written entry test that assesses your general knowledge of mathematics as well as your specific knowledge of themes relevant to your chosen curriculum. When the test takes place depends upon a number of factors, including whether you are an EU citizen or not. Economic Campus, Cannaregio 873, Venice
campus.economico@unive.it

www.unive.it/degree/em9

CAREER OPPORTUNITIES

Graduates can find employment with companies, tourism organisations, local governments, consortia and consulting companies operating in the tourism sector or launch out on their own as tourism entrepreneurs. They are equipped to launch a career as:

- international tourism experts
- sales managers
- destination managers
- operators and managers in agencies for both incoming and outgoing tourism with a particular awareness of the importance of cultural and language differences among market segments of tourist demand
- tourist web marketing manager
- tourist entrepreneurs with a strong inclination towards intercultural/international markets
- consultants in tourist development for businesses, business networks and tourist industries

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

INTERNATIONAL MANAGEMENT

Language of instruction: 

This degree programme trains you as an expert in the management of private and public companies in all sectors who is capable of dealing with the challenges and exploiting the opportunities associated with the profound transformations of the international socio-economic context. The study plan is designed to help you develop a wide range of advanced skills in the main areas of management studies, providing you with the knowledge you need to perform effectively in the competitive market environment of multinationals and companies fostering internationalisation. The degree also delves into the strategic planning processes associated with the dynamics of international corporate openness, and provides conceptual and analytical tools for problem-solving and decision-making in management at the corporate, business and functional levels. The programme is characterised by a "learning-by-doing" approach, incorporating dynamic and engaging learning activities such as projects and moments in contact with the protagonists of the business world and institutions during the course of the lectures.

CAREER OPPORTUNITIES

As a graduate of the International Management programme, you will be ready for employment involving the management of companies of all sizes, both public and private. The professional roles well-suited to the profile you will acquire include:

- Business analyst in a strategic consulting firm or multinational company
- Export manager
- Foreign branch manager
- Sales manager on an international scale

- Supply manager on an international scale
 - Head of organisation and human resources management for a multinational company
- You will also be prepared to perform tasks in a range of different areas of activity, including:
- Strategic planning
 - International supply chain management
 - Personnel management
 - Management of foreign sales
 - Logistics and international sourcing

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- You must take an online written entry test that assesses your general knowledge of mathematics as well as your specific knowledge of themes relevant to your chosen curriculum in order to be evaluated for admission. When the test takes place depends

upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.

ITALIAN PHILOLOGY, LINGUISTICS AND LITERATURE

Language of instruction: 

This degree programme has a historical-methodological focus and offers a solid specialised education in linguistic-philological and literary studies, training you as an expert in Italian literature and Italian linguistics as well as Italian and Romance philology with a focus on European literature.

The core of the programme is the in-depth study of the critical methods that are crucial for reading and interpreting primary, literary and documentary sources, but the degree also focuses on providing you with an increased awareness of the dialectical relationship between the past and the present, a critical approach to broad and complex problems, including those of a social nature, using the cultural background that emerges from the texts as a starting point. Depending on the curriculum you choose, you can expand your knowledge of and competencies in the Mediaeval/Renaissance field (Italian and Romance), the modern/contemporary (Italian) period or favour a broader European perspective.

CURRICULA

- Medieval and Renaissance Period 
- Modern and Contemporary Period 
- European 

CAREER OPPORTUNITIES

Education geared towards honing basic skills to solve complex problems is of primary importance in today's job market. As a graduate in the humanities, you are often able to work their way up to management positions in public and private enterprises of all kinds. In addition to the general preparation provided by this programme, you will

also acquire more specific skills that will prepare you for employment in publishing houses, editorial offices, press offices, communication companies and, more generally, companies that have a communication office or unit. You will also be able to seek opportunities in libraries, museums, archives, documentation centres and foundations as well as public and private bodies involved in the protection, enhancement and promotion of historical, cultural and artistic heritage.

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

LANGUAGE AND MANAGEMENT TO CHINA

Languages of instruction:  + 

This innovative master's programme, which is the only one of its kind in Italy, pairs an in-depth knowledge of modern Chinese with skills related to marketing, management and law, specifically focusing on the context of modern-day China. Despite having a solid theoretical basis, the economic, legal and management skills the programme helps you acquire are strictly linked to management and market scenarios in China. Maintaining the same focus, the programme's language learning focuses particularly on sector-specific terminology related to the economic and legal spheres while the study plan as a whole is designed to tackle issues related to the growing internationalisation and globalisation of

companies, entities and institutions. While the programme's language and IT courses are taught in Italian, all of the other courses are taught in English.

CAREER OPPORTUNITIES

The programme thus prepares you to work in high-responsibility positions focused on relations with China in businesses, financial institutions and public entities. Some of the possible career avenues open to graduates include:

- Business consultant for the Asian market
- Specialist in the marketing of goods and services offered to the Chinese market
- Language consultant and interpreter specialising in business negotiations with Chinese companies
- Translator of Chinese commercial or technical media

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of Chinese, English and Italian** is required.

DOUBLE /JOINT DEGREE AVAILABLE

Double degree with Higher School of Economics Saint Petersburg (Russia)

LANGUAGE SCIENCES

Languages of instruction:  or 

This programme offers you an advanced command of one of a range of foreign languages, including Albanian, Arabic, Czech, English, French, German, Italian Sign Language (LIS, including tactile sign language), modern Greek, Polish, Portuguese and Brazilian Portuguese, Romanian, Russian, Serbo-Croatian and Spanish. Depending on the curriculum you choose, you focus on a different area of study by applying an in-depth comparative approach: the themes and teaching tools for teaching Italian to foreigners and foreign languages to Italians; advanced research tools for the analysis of language disorders and linguistic acquisition in case of deafness and bilingualism; the formal analysis of language; new technologies for the study of languages and linguistics; and

culture and literature in the different phases of their development and the historical-diachronic evolution of your focal language. The modules are taught in multiple languages, including your chosen language of specialisation and English. You can also strengthen your expertise in specific areas of language studies, such as the teaching of foreign languages and Italian as a foreign language, the psychology of development and learning applied to language, computer science and information processing systems in language processing, linguistic analysis of speech and deafness disorders, the most advanced linguistic theories and the study of competence and processing in typical and atypical situations (eye tracking).

For the other paths and curricula, a **certified B2-level knowledge of Italian and a certified B2-level knowledge of English** are required.

DOUBLE/JOINT DEGREES AVAILABLE

- European joint master's degree in English and American Studies with the Otto-Friedrich Universität – Bamberg (Germany); Karl-Franzens Universität – Graz (Austria); Université Paris Cité (France); Universitat Autònoma de Barcelona (Spain), Jagiellonian University (Poland), New York City College (USA - mobility partner only), Pécsi Tudományegyetem (Hungary - mobility partner only). The selection procedure is managed by a consortium through a dedicated portal.
- Double degree with the Goethe-Universität Frankfurt am Main (Germany)
- Double degree with the University of Bucharest (Romania)
- Double degree with the University of Nova Gorica (Slovenia)
- Double degree with the Higher School of Economics - Moscow (Russia)

LANGUAGES AND CIVILISATION OF ASIA AND MEDITERRANEAN AFRICA

Language of instruction: 

This programme allows students to achieve proficiency in an Asian or North African language (including micro-languages), providing an in-depth knowledge of its associated literature, history and culture, including philosophy and religion, society and institutions, archaeology and art.

LANGUAGES

- Arabic, Hebrew, Hindi, Persian or Turkish (Near and Middle East curriculum)
- Chinese (China curriculum)
- Japanese (Japan curriculum)
- Korean (Korean curriculum)
- Thai or Vietnamese (South Asia curriculum)

CURRICULA

- China 
- Japan 
- Korea 
- Near and Middle East 
- South Asia 

CAREER OPPORTUNITIES

Graduates are prepared to assume important roles in the publishing and communication sectors, in international, cultural and social co-operation organisations and in Italian institutions abroad, as well as work to as area specialists and translators of literary texts. Possible career paths include:

- Interpreter
- Translator
- Technical editor
- Image and public relations consultant
- Linguist or philologist
- Museum curator
- Publishing professional

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- For the language requirements of each curriculum, please check the programme web page.
- For all curricula, a **certified B2-level knowledge of both Italian and English** is required.

DOUBLE/JOINT DEGREE AVAILABLE

- Double degree with Capital Normal University (China)
- Double degree with Universidad de Sevilla (Spain)

LANGUAGES, ECONOMICS AND INSTITUTIONS OF ASIA AND NORTH AFRICA

Language of instruction: 

This programme allows you to achieve proficiency in an Asian or North African language and helps you acquire an in-depth knowledge of the economic, legal, historical and political aspects of the relevant geographical area. You will also acquire a knowledge of sociolinguistic and communication processes as well as a familiarity with IT and electronic means of communication.

LANGUAGES

Arabic, Chinese/English, Chinese, Japanese.

CURRICULA

- Language, Economics and Institutions of Japan 
- Language, Politics and Economics in Arabic countries 
- Language, Societies and Institutions of Contemporary China 

CAREER OPPORTUNITIES

Graduates can find employment with businesses and financial institutions operating in Asian and North African markets, with national and international public organisations, with volunteer facilities and institutions operating in cooperation with these and in development sectors. Possible career opportunities include:

- Interpreter
- Translator
- Technical editor
- Linguist or philologist
- Researcher and educator
- Journalist
- Economic systems specialist
- Market regulation specialist
- Economic planning specialist
- Economic and financial consultant

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- You must take an entry test that assesses your general knowledge of economics and history in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.
- For all curricula, a **certified B2-level knowledge of both Italian and English** is required.

MANAGEMENT AND SUSTAINABILITY

Language of instruction: 

In this day and age, understanding the implications of sustainable management is an essential tool for all companies. In response, this innovative programme provides you with an expertise in perceiving and structuring how a business operates and manages innovation in terms of sustainability.

The degree programme ensures that you acquire specific sustainability-related skills with regard to company management by expanding your knowledge of a business's internal organization and its relationship to its external environment. It also explores corporate strategy, strategic planning and sustainability management, planning and control, non-economic and performance measurement, marketing, human resources management, business innovation systems, information and decision support systems, labour law, and technology management.

CAREER OPPORTUNITIES

As a graduate, you will be prepared to contribute to the design of sustainable development strategies, manage innovation opportunities (including in the circular economy), implement sustainability, environmental and social impact initiatives by harnessing the opportunities arising from digital transformation, promote and implement stakeholder engagement initiatives, and make use of the most up-to-date methodologies for measuring, reporting and measuring sustainability performance. You will be equipped to seek employment in large, medium or small companies anywhere in the world and to deal with processes in public or private industrial, commercial-distribution or service companies.

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- You must take an entry test that assesses your knowledge of economics in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.
- A **certified B2-level knowledge of both Italian and English** is required.

DOUBLE /JOINT DEGREE AVAILABLE

Double degree with the ESCP Business School (France)

CONTACT INFORMATION:

Venice School of Management
Economic Campus, Cannaregio 873, Venice
campus.economico@unive.it

MARKETING AND COMMUNICATION

Language of instruction: 

Do you want to become a manager in the marketing and communication field? If so, this programme helps you acquire the communication skills you need and provides opportunities for professional development through targeted workshops and internships at marketing and communications firms. In fact, this programme complements traditional classroom lectures with a particularly long internship period in order to emphasise the importance of practical professional development and hands-on learning. Once enrolled, you can also apply for a double degree with the École Supérieure de Commerce de Paris-Europe (if you have completed the bachelor's degree in Economics and Business at Ca' Foscari).

CAREER OPPORTUNITIES

Graduates can find employment as product managers, brand managers, category managers, sales and marketing managers of companies specialising in goods and services, account managers in advertising, market research and marketing and communications consultants. Additional career opportunities include:

- International commercialisation of goods and services
- Information technology specialist
- Communication consultant
- Market analyst
- Image and public relations consultant

ENTRY REQUIREMENTS AND ADMISSION

- All candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- You must take an entry test that assesses your

general knowledge of economics as well as your specific knowledge of themes related to marketing and communication in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.

- A **certified B2-level knowledge of both Italian and English** is required.

PEDAGOGICAL SCIENCES FOR INCLUSIVE COMMUNICATION MEDIATED BY LIS (ITALIAN SIGN LANGUAGE)

Language of instruction: 

This is Italy's first master's degree for communication assistants, essential figures in schools of any level in which there are deaf and/or hearing students who use Italian Sign Language as their main means of communication (e.g., students with non-verbal autism or non-verbal syndromes). The programme unites the study of the education sciences with linguistic studies, offering an innovative, active and participatory learning experience while building professional competencies that can flexibly adapt to a variety of needs in education and training. The degree is offered in collaboration by Ca' Foscari University, Roma Tre University and the University of Palermo, which acts as the programme's administrative hub. Thanks to this partnership, you benefit from the three institutions' complementary areas of expertise in relation to deafness and Italian Sign Language. Due to the multi-institution collaboration, the programme employs a blended learning approach. Each student chooses a home university from among the three partners, where they will attend the courses offered by that institution in person while following those offered by the other two universities online. To ensure

that the learning experience always integrates the online and in-person student groups, there are classroom tutors who act as individual and group facilitators (e.g., by relaying questions from a course's online students to those attending the class in person) and coordinate workshops and lab activities.

CAREER OPPORTUNITIES

Graduates are qualified to work as communication assistants in schools of all levels, as well as in educational and vocational training centres, at universities (as tutors for students), and in networking projects for families. As freelancers, they can offer their specialised skills in communication and Italian Sign Language to third-sector organisations or individual clients.

ENTRY REQUIREMENTS AND ADMISSION

Applications are submitted to and evaluated by the University of Palermo.

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

PHILOSOPHICAL SCIENCES

Language of instruction: 

This programme develops and hones all of the skills you need in order to explore and analyse important philosophical and epistemological issues, especially through discussion and debate. There are two curricula available: the Philosophy curriculum builds your theoretical, ethical, historical and philosophical knowledge and skills, while the Educational Counseling and Training curriculum helps you discover and explore educational training processes in a social context as well as develop pedagogical tools. Over the course of the programme, you learn how to analyse topical issues through the application of philosophical reasoning in order to evaluate the relevant aspects and cultural traditions of the sciences and the arts, and of communication and language. The programme emphasises the pairing of methodological and pedagogical know-how with practical education science skills.

CURRICULA

- Philosophy 
- Educational Counseling and Training 

CONTACT INFORMATION:

Department of Philosophy and Cultural Heritage
Humanistic Campus
Palazzo Malcanton Marcorà
Dorsoduro 3484/D, Venice
campus.umanistico@unive.it

www.unive.it/degree/fm61

CAREER OPPORTUNITIES

Graduates are equipped to carry on to advanced studies in the fields of philosophical and social analysis and educational counseling. They can also pursue a first-level professional master's programme dealing with philosophy and philosophical counseling or with the science of cognition and educational training. Career opportunities can be found in the following fields:

- Education and research
- Publishing and advertising
- Human resources
- Philosophy
- Journalism
- Law
- Business consultancy
- Libraries and archives

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of Italian** and a **certified B1-level knowledge of English** are required.

DOUBLE /JOINT DEGREE AVAILABLE

Double degree with Université Bordeaux Montaigne (France)

RELIGIOUS STUDIES

Language of instruction: 

Offered jointly with the University of Padua, this master's degree trains you to be a religious studies specialist with a strong understanding of socio-anthropological analysis. Equipping you with the ability to interpret texts, languages, historical events and cultures, it deepens your understanding of the religions of the Mediterranean, the Middle East, India and Eastern Asia. The programme of study places special emphasis on the philological-linguistic skills fundamental to the direct reading of texts and allows for the critical study of sources in order to provide you with a thorough understanding of religions.

CAREER OPPORTUNITIES

Graduates can find employment at both public and private institutions as social workers or as experts in inter-religious relations and communications or multi-confessional social contexts. They may also assume positions of responsibility at Italian and international research centres focusing on religion or in religious publishing. Career opportunities can be sought in the following fields:

- Research on religion and theology
- Education
- Specialised publishing
- Journalism
- Public service

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

SCIENCE AND TECHNOLOGY OF BIO AND NANOMATERIALS

Language of instruction: 

If you are interested in nanotechnologies, then this programme provides you with a strong multidisciplinary training in material science, chemistry and biology that will allow you to become an expert in the design and synthesis of new bio/nanomaterials. The programme pairs lectures and laboratory classes that teach you how to prepare bio/nanomaterials, exploring their chemical-physical characteristics, properties, methods of preparation and applications. During your studies, you are given the chance to carry out an internship and learn on the job at research laboratories and companies both in Italy and abroad. Thanks to the skills and knowledge you gain from this master's degree, you will be able to work in the technical sectors of companies that produce, market, transform or develop materials, or further your education with a doctoral degree.

CAREER OPPORTUNITIES

Graduates are prepared to work in all of the technical areas of companies that deal with the manufacturing, processing and development of both structured and functional bio/nanomaterials. Possible career opportunities include:

- Chemist
- Chemical information management specialist
- Industrial and commercial consultant
- Specialist consultancy
- Researcher

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements and must have a minimum CGPA (Cumulative Grade Point Average).
- A **certified B2-level knowledge of English** is required.

DOUBLE/JOINT DEGREE AVAILABLE

Double degree with the Kyoto Institute of Technology (Japan)

CONTACT INFORMATION:

Department of Molecular Sciences
and Nanosystems
Scientific Campus
Via Torino 155, Mestre
campus.scientifico@unive.it

www.unive.it/degree/cm14

SUSTAINABLE CHEMISTRY AND TECHNOLOGIES

Language of instruction:  or 

This programme trains you to be a professional chemist capable of developing original ideas, designing new processes in research and applied/industrial contexts and applying the tools and ideas of modern chemistry to the solution of biological problems at the molecular level. It employs a unique approach to the study of sustainable and green chemistry by providing you with an in-depth knowledge of the interaction between chemical production and the environment. It also tackles the emerging discipline of Chemical Biology that sits at the crossroad of traditional chemistry and biology, equipping you with the ability to bridge disparate fields and the confidence to tackle research in sustainable and green chemistry and technology, biomolecular studies and biotechnologies in a multidisciplinary environment.

The programme offers three distinct curricula: Biomolecular Chemistry (taught in English), Chemistry (taught in Italian) and Industrial Chemistry (taught in Italian).

The course of study is markedly interdisciplinary and offers many hands-on formative and international internship opportunities, thereby providing you with the skills you need to assume both highly qualified technical and academic positions in research and development, quality assurance and production control. Upon graduation, you will have the skill set required to become a highly qualified specialist or consultant in different industries or to work in international biological/environmental protection.

CURRICULA

- Biomolecular Chemistry 
- Chemistry 
- Industrial Chemistry 

CAREER OPPORTUNITIES

Graduates are prepared to work as employees or freelance professionals in any of the departments of a modern company or at a research institute, as well as perform managerial tasks in the chemical industry (both basic and "fine") and manufacturing. Possible career opportunities include:

- Biotechnologist
- Chemist
- Chemical information management specialist
- Chemical manufacturing consultant
- Process developer
- Product designer
- Researcher
- Specialist consultant for companies and governmental agencies

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- For the Biomolecular Chemistry curriculum, a **certified B2-level knowledge of English** is required; for the other two curricula, a **certified B2-level knowledge of both Italian and English** is required.

campus.scientifico@unive.it

www.unive.it/degree/cm7

TRANSLATION AND INTERPRETING

Language of instruction: 

Unique in Italy, this programme integrates translation and interpretation skills with specific language combinations, depending on the curriculum and languages you choose. One of the curricula is dedicated to translation and interpreting with a focus on Chinese, Italian, and English. This curriculum's study plan helps you master the principal techniques and methodologies employed in professional interpretation and translation, as well as how to use IT tools for assisted translation. You learn to tackle the most diverse linguistic-literary and socio-cultural issues with a comparative and intercultural approach and to analyse and translate technical, literary, editorial and multimedia texts. You also learn how to do liaison interpreting, consecutive and chuchotage (whispered) interpreting, as well as how to manage complex technical professional projects. In addition to providing a wealth of technical skills, these activities aim to deepen your understanding of the intercultural and interlinguistic dynamics in which you will find yourself working after graduation.

The same toolbox of knowledge and skills are provided to those who choose the second curriculum and opt for a focus on Spanish-English translation and interpreting. However, this curriculum comprises three distinct study paths, offering two other options apart from Spanish-English: these two alternative paths allow you to choose to study translation and interpreting with a focus on Italian Sign Language paired with either Spanish or English, thereby making it a programme that is not offered anywhere else in Italy.

CURRICULA

- Translation and Interpreting (Italian–Chinese–English)
- Specialized Translation (English–Spanish; English–Italian Sign Language; or Spanish–Italian Sign Language)

CAREER OPPORTUNITIES

Graduates can seek employment with international companies and organisations or translation agencies in a variety of capacities. Career opportunities can be found in a variety of fields, including:

- Interpreting
- Translation
- Cross-linguistic communication and advertising
- Linguistic or philological consultancy
- Technical text editing
- International cultural exchange consultancy
- International public relations
- International journalism

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- You must take an entry test that assesses your knowledge of Italian and English as well as the focal language of your chosen curriculum in order to be evaluated for admission. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult this programme's profile on apply.unive.it.

- A **certified B2-level knowledge of both Italian and English** is required for both curricula; you must also possess an excellent knowledge of the other languages connected with the study path you select.

TRANS-MEDITERRANEAN STUDIES: MIGRATION, COOPERATION AND DEVELOPMENT

Languages of instruction:  + 

This programme aims to prepare a new generation of Mediterranean specialists in intercultural communication and mediation who possess a thorough knowledge of Mediterranean issues and are capable of establishing networks involving both academic and non-academic actors, such as national and international political institutions, economic operators and journalists. To achieve this goal, this master's degree programme offers you an in-depth knowledge of the contemporary Mediterranean world and the interactions between the countries of which it is comprised. Through the central themes of migration, cooperation and development, the course provides an innovative perspective on the Mediterranean as a context of interaction between Africa, Asia and Europe, exploring it as a lens through which to interpret the globally significant political, social and cultural phenomena that characterise our modern world. Applying an interdisciplinary approach that draws upon the fields of sociology, geography, history and law, the course equips you with theoretical and methodological skills connected to migration studies more generally and to the political, economic and cultural relations in the Mediterranean area more specifically. In addition, you will acquire skills in qualitative research and data analysis as well as reinforce your linguistic knowledge.

CAREER OPPORTUNITIES

Graduates are trained to be communication specialists (press, television, cinema, social networks, editorial consultancy), transcultural intermediation experts working for cultural

associations and organisations, socio-political experts working for think-tanks tackling Mediterranean issues. Career opportunities can therefore be found in the following contexts:

- Design and promotion of sustainable development projects
- Euro-Mediterranean cooperation
- Social, cultural, economic and tourism consultancy
- Promotion of cultural exchange and cooperation

ENTRY REQUIREMENTS AND ADMISSION

- Candidates must be assessed to confirm their personal preparation and minimum credit requirements.
- You must take part in an interview and provide a brief essay in response to one of the proposed themes. In order to have your interview scheduled, you need to register for the selection procedure, which takes place in the early summer. For more information, consult this programme's profile on apply.unive.it.
- A **certified B2-level knowledge of both Italian and English** and a **certified B1-level knowledge of French** are required.

WORK, SOCIAL CITIZENSHIP, INTERCULTURALITY

Language of instruction: 

This programme prepares you for social work, social services and social politics by combining a high-level cultural education with advanced professional training. Over the course of your studies, you develop a strong ability to analyse and interpret social phenomena, especially inequality, social discomfort and processes of exclusion, the social "new rich" and the vulnerable groups that are generated by these contexts, the social rights of citizens and the transformation of welfare, migration and intercultural relations, questions of gender and generalisations, and participation and active citizenship as elements of social innovation. Thanks to a series of focused workshops with professionals, you acquire innovative methodologies related to social initiatives. A 250-hour internship, which you carry out either in Italy or abroad, is an integral part of the programme. The skills you gain from the degree equip you to pursue a career in project planning, research, analysis and social initiatives in organisations and institutions operating in the fields of social work, interculturality, social services, labour policy and social and health services.

CURRICULA

- Social Work 
- Welfare Policies and Social Research 

CAREER OPPORTUNITIES

Graduates are prepared for employment in the areas of planning, research, analysis and intervention with bodies, administrative entities and institutions operating in the fields of social work and social and health services. They may also work in the processing and implementation of social equity policies, initiatives and measures aimed at fighting conditions of social discrimination and exclusion, and in creating and developing projects for the social inclusion and integration of immigrant populations. Career opportunities can be sought in the following fields:

- Public administration management
- Sociology research
- Social work
- Social programme management
- Healthcare
- Education

ENTRY REQUIREMENTS AND ADMISSION

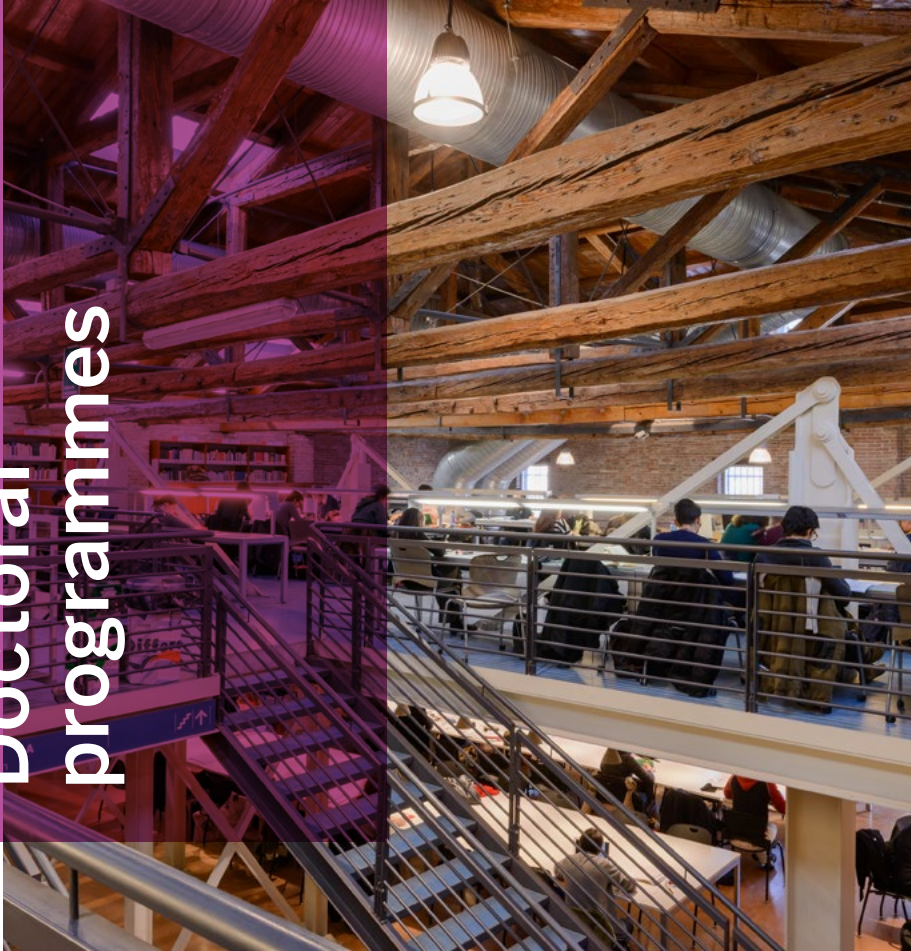

- Candidates must be assessed to confirm their possession of the minimum curricular and experiential requirements.
- A **certified B2-level knowledge of both Italian and English** is required.

Doctoral programmes

The doctoral degree (PhD) is the highest university qualification that a student can obtain. In Europe it generally lasts three years and involves on-campus study under close supervision as well as professional training and e-learning activities. A doctoral degree is awarded to a candidate who has submitted a thesis or dissertation that is the culmination of extensive original research in the candidate's chosen field.

ADMISSION REQUIREMENTS

In order to be a qualified candidate, you must already have a master's degree and a relevant academic background in your chosen field of study. You must also have a certified B2-level knowledge of the language of instruction (as per the Common European Framework of Reference for Languages, or CEFR). Depending on the doctoral programme that interest you, there may also be additional entry requirements.

HOW TO APPLY

In the spring, Ca' Foscari puts out a call for applications providing a detailed explanation of the application and selection procedures. To be admitted to a doctoral programme, you must participate in a public selection process that entails the evaluation of their academic qualifications as well as an oral and/or written exam. This selection process yields a ranked list of eligible candidates.

SCHOLARSHIPS AND FINANCIAL AID

Almost without exception, the candidates deemed eligible as a result of the public selection process are offered a doctoral scholarship.

CONTACT INFORMATION:

PhD Office
San Sebastiano
Dorsoduro 1686, 30123 Venice, Italy
www.unive.it/graduateschool-en
phd.office@unive.it

ECONOMICS

ECONOMICS

This doctoral programme offers advanced training in economics and finance, providing you with the necessary tools for conducting original research for your doctoral dissertation on socio-economic systems or financial markets. Various specialisations are offered with a focus on both microeconomic analyses (for example, how economic agents behave, how markets and economic organisations work, how economic policy affects economic outcomes) and macroeconomic analyses (for example, issues regarding economic cycles, unemployment, inflation, trade and forecasts and expectations of financial markets).

www.unive.it/phdeconomics

LAW, MARKET AND PERSON

This doctoral programme aims to provide you with the education and experience to become a legal expert specialised in understanding and interpreting contemporary European law as the result of the interaction between national and international factors and dynamics.

www.unive.it/law-market-person

MANAGEMENT

This doctoral degree offers an international study programme that is designed to train you in different areas of management studies, including: organisational economics and game theory, innovation and entrepreneurship, organisation theory and design, human resource skills and management, marketing, accounting regulation, strategic management, cultural management, behavioural economics, business history, corporate finance and sustainability.

www.unive.it/phdmanagement

SCIENCE AND MANAGEMENT OF CLIMATE CHANGE

This doctoral programme was established in collaboration with the Euro-Mediterranean Centre on Climate Change, a world leader in international climate change research. The programme provides you with a broad yet thorough background in economics and equips you to carry out original and innovative research on themes regarding the dynamics of climate change and the methodologies and techniques used in its evaluation and management in terms of mitigation and adaptation measures and policy.

www.unive.it/phdclimatechange

ARTS AND HUMANITIES

ANCIENT HERITAGE STUDIES

This doctoral programme explores all aspects of antiquity and is designed to develop and facilitate your use of specific methodologies and techniques in the study of monuments and texts through the exploration of a broad range of themes and disciplines associated with the historical and interpretive challenges they pose.

www.unive.it/ancient-heritage

HISTORICAL, GEOGRAPHICAL AND ANTHROPOLOGICAL STUDIES

This programme is designed to prepare you with exceptional research skills for the study of the historical phenomena that have shaped European society from the Middle Ages through to present day.

www.unive.it/historical-geographical-anthropologic-studies

HISTORY OF ARTS

This doctoral degree explores the history of art in all of its possible meanings. The programme places an emphasis on the valorisation of artistic-cultural, territorial and environmental heritage.

www.unive.it/history-arts

ITALIAN STUDIES

This doctoral programme provides you with the skills and knowledge required to study Italian texts from all periods as well as works in other languages that were penned in similar historical, geographical and cultural contexts.

www.unive.it/italian-studies

PHILOSOPHY AND EDUCATIONAL SCIENCES

This doctoral programme intertwines traditionally distinct yet culturally convergent avenues of research by combining the study of philosophical reasoning with the exploration of the social, psychological, cognitive and educational sciences.

www.unive.it/philosophy-educational-sciences

LANGUAGES AND CULTURES

ASIAN AND AFRICAN STUDIES

This doctoral degree provides you with both an advanced knowledge of the field of Asian and African studies and the exceptional methodological and analytical skills that innovative research requires. The programme equips you to comprehend and interpret varied phenomena in the historical, geographical and cultural contexts by focusing principally on primary sources written in a range of Asian languages.

www.unive.it/asian-african-studies

MODERN LANGUAGES, CULTURES AND SOCIETIES AND LINGUISTICS

This doctorate offers a choice between two curricula: "Modern Languages, Cultures and Societies" and "Linguistics". Both streams integrate the study of languages, language science, literature and culture in a wide range of academic and cultural projects.

www.unive.it/languages-cultures-linguistics

SCIENCE AND TECHNOLOGY

COMPUTER SCIENCE

This doctoral programme provides you with the formal tools necessary for rigorously developing and implementing research, making you an expert in the methodologies employed in the planning and evaluation of systems and computer systems.

www.unive.it/phdcomputerscience

ENVIRONMENTAL SCIENCES

Promoting an interdisciplinary approach, this programme equips you to explore and develop solutions to the various global issues we are facing today with respect to the environment, ecology and social development.

www.unive.it/phdenvironmentalsciences

POLAR SCIENCES

This unique programme prepares students with in-depth scientific competencies and allows them to develop original research in order to become experts on topics related to recent and past changes to the climate and environment of the polar regions and the glaciated areas of high altitude/low latitude sites. Thanks to the employment of an interdisciplinary approach, students of the programme acquire a profound scientific understanding of the processes regulating the climate change underway in the polar regions.

www.unive.it/polarscience

SCIENCE AND MANAGEMENT OF CLIMATE CHANGE

This doctoral programme is a joint initiative between Ca' Foscari, the Euro-Mediterranean Center on Climate Change and the Istituto Nazionale di Oceanografia e Geofisica Sperimentale. It offers a 4-year fully funded scholarship that involves one year of full-time coursework as well as worldwide research opportunities and connections to a broad international network of excellent universities and research centres in the field

www.unive.it/phdclimatechange

SCIENCE AND TECHNOLOGY OF BIO AND NANOMATERIALS

This programme is carried out in partnership with the National Cancer Institute (Centro di Riferimento Oncologico, CRO) in Aviano, Italy. Students will have the opportunity to develop their own research projects by making use of the resources and laboratories of both the CRO and the Department of Environmental Sciences, Informatics and Statistics at Ca' Foscari.

www.unive.it/nanotechnologies

SUSTAINABLE CHEMISTRY

This doctoral programme aims to go beyond traditional chemistry studies by specifically focusing on sustainable research strategies in the design and development of new chemical processes, products and materials, preparing its graduates to play a pivotal role in the ideation, design and development of innovative solutions for a sustainable society.

www.unive.it/chemistry

Professional master's programmes

WHAT IS A PROFESSIONAL MASTER'S PROGRAMME?

In the Italian university system, first-level or second-level professional master's programmes (*Master universitari di primo/secondo livello*) involve at least one year of postgraduate specialisation or executive education and training. A professional master's diploma requires that you acquire 60 ECTS credits.

STUDY OFFER

The Challenge School's offerings are constantly evolving in response to the needs and interests of professionals and the workplace. Up-to-date information about what is on offer can be found online on the Challenge School's website.

ADMISSION REQUIREMENTS

An undergraduate degree in a relevant field is required for acceptance into first-level programmes. For second-level programmes, candidates must have acquired a master's degree in a pertinent field.

HOW TO APPLY

Every spring, Ca' Foscari puts out a call for applications that provides all of the information regarding the application and selection procedures.

SCHOLARSHIPS AND FINANCIAL AID

Depending on the selected programme, scholarships and loans are available.

CONTACT INFORMATION:

Ca' Foscari Challenge School
www.unive.it/challengeschool-en
master.challengeschool@unive.it
corsi.challengeschool@unive.it

Fees and how to apply

FEES AND LIVING EXPENSES

Ca' Foscari's tuition fees are remarkably low. This is a result of both heavy subsidising by the Italian Ministry of Universities and Research, which covers approximately 70% of the actual cost, and Ca' Foscari's belief in the need to make university affordable to all. The most you as an international student will pay for your studies is virtually the same as – or in some cases, less than – an Italian student pays. In addition, Ca' Foscari offers a variety of forms of financial aid, including scholarships, exemption from and reduction of fees, student loans and awards for outstanding theses. For more information, visit www.unive.it/financialaid.

| | Students from Italy and EU countries ¹ | Students from non-EU OECD countries | Students from economically developing countries ³ | Students from all other countries |
|---|---|-------------------------------------|--|-----------------------------------|
| Yearly tuition fees for bachelor's degrees ² | approx. € 2,300 | € 2,100 | € 700 | € 1,300 |
| Yearly tuition fees for master's degrees | approx. € 2,550 | € 2,300 | € 700 | € 1,300 |

¹ Including San Marino

² The Digital Management (approx. 8,800) and Hospitality Innovation and e-Tourism (approx. 7,000) programmes are exceptions.

³ The list of developing countries is determined by the Italian Ministry of Universities and Research each year. For more information, write to prospective.students@unive.it.

FINANCIAL AID

In recognition of academic excellence, and in order to make the choice to study at Ca' Foscari more affordable, the university offers financial aid specially earmarked for high-achieving international students enrolling in a bachelor's or master's degree programme.

For academically gifted bachelor's and master's degree students beginning their studies in the autumn of 2024, Ca' Foscari is offering renewable entrance scholarships ranging in amount from 6,500 to 8,000 euro per year. To see if you are eligible and to learn how to apply, please visit www.unive.it/scholarships.

The university also offers partial tuition fee reductions for high-achieving students enrolling in the Foundation Year programme offered by Ca' Foscari's School for International Education. To see if you are eligible and to learn how to apply, write to foundation.cfsie@unive.it.

After enrolment, bachelor's and master's students from low-income families have the option to apply for income-based financial aid provided by the regional government of the Veneto.

HOW TO APPLY

BACHELOR'S AND MASTER'S PROGRAMMES

There are multiple calls each year for admission to begin a bachelor's or master's degree in the following academic year.

For the precise dates of each call, which are determined at the beginning of each academic year, visit apply.unive.it.

Preliminary online evaluation

If you have carried out your preparatory studies outside of Italy, you must begin the application process by requesting a preliminary online evaluation of your qualifications at apply.unive.it. You need to register an account and then upload high-quality colour scans of the required documents. If your chosen programme of study is taught in English, you must demonstrate your possession of a B2-level knowledge of this language (e.g., IELTS, minimum 5.5; TOEFL IBT, minimum 72). For more information about the application procedure and deadlines, visit www.unive.it/evaluation, and to learn more about language requirements, visit www.unive.it/language-requirements.

Entry tests for limited admission programmes

If you are applying to a programme with limited admission, you will be required to take an entry test. The test's format and when it takes place depend upon a number of factors, including whether you are an EU citizen or not. For specific information about the right test for you, consult the profile page of the programme that interests you on apply.unive.it.

DOCTORAL PROGRAMMES

Each year Ca' Foscari issues a single call for applications in the spring that provides all of the necessary details about the application and selection procedures for all doctoral programmes.

To be admitted to doctoral studies, candidates must participate in a public selection process that entails the evaluation of their academic qualifications as well as an oral and/or written exam.

For more information about how to apply, please write to phd.office@unive.it.

PROFESSIONAL MASTER'S PROGRAMMES

An undergraduate degree in a relevant field is required for acceptance into first-level programmes. For second-level programmes, you have to already possess a two-year master's degree in a pertinent field.

Each spring, Ca' Foscari issues a call for applications that provides all of the information regarding the application and selection procedures.

For more information about how to apply, please write to master.challengeschool@unive.it.

Academic calendar

Ca' Foscari's academic year begins in early September.

Courses in Science & Technology and Languages & Cultures are generally offered over two semesters:

First semester: September – December
Exams: January

Second semester: February – May
Exams: June

Additional exam session: Late August – early September

Courses in the Economics & Management and Humanities fields are generally offered over four terms:

First term: Mid September – mid October
Exams: End of October

Second term: November – early December
Exams: Mid December

Third term: February – mid March
Exams: End of March

Fourth term: April – early May
Exams: Last half of May

Additional exam session: Late August – early September

CLOSURES AND HOLIDAYS

Ca' Foscari closes for approximately two weeks in the winter, beginning shortly before Christmas (December 25) and ending shortly after Epiphany (January 6). It also closes for the summer for approximately ten days in the period of Ferragosto (August 15).

BANK HOLIDAYS:

November 1: All Saints' Day

November 21: Madonna della Salute (Festival of St Mary of Health)

December 8: Immaculate Conception

December 24–January 6: Christmas Holidays

Late March–mid April: Easter Holidays

April 25: National Liberation Day

May 1: Labour Day

June 2: Republic Day
