**PROJECT SUMMARY:**

The REUERHC project aims to support the integration of migrants and refugees in the economic, political, and social dimension of the partner countries. Doing so, it will answer the following Erasmus priorities: social inclusion, further strengthening of key competences in VET, sustainable investment, performance and efficiency.

Since migrants and refugees represent a group that is often at risk of exclusion, the project's primary objective is to make available, train and encourage the development of professional qualifications and opportunities of self-employment. On the other hand, it intends to provide help to national economies of the hosting countries with the integration process.

To do this, the project intends to develop four different intellectual outputs and organize five transnational project meetings, a joint staff training event, six multiplier events and a wide dissemination campaign suitable for the planned activities (with project logo, website, four newsletters, Facebook page of the project, Facebook group, conferences and press releases, a video spot to promote the EC's efforts, an eBook of best practices, the organization of multicultural festivals and public seminars and debates, etc.).
