HOHENHEIM SUMMER SCHOOL 2025 DIGITALIZATION FOR SUSTAINABILITY – SUSTAINABLE DIGITALIZATION

Application deadline
April 15th, 2025

What is the Summer School about?

The so-called “twin transformation” refers to the intertwined trends of digitalization and sustainability—a relationship that is dynamic, complex, and sometimes contradictory. While digitalization can contribute to sustainability by enabling efficiency gains and smarter resource use, it also relies on high resource consumption and may trigger rebound effects. In this Summer School, you will explore how individuals, organizations, and societies act as both drivers and targets of this transformation.

Understanding its impact requires analyzing not only its harmonies and contradictions but also its interconnectedness with societal and economic demands.

Earn 6 ECTS, which can be recognized as free-choice or extra credits in your Ca' Foscari study plan. Tuition fees are exempted for Ca' Foscari students.
